Naturopathic Physical Medicine provides a philosophical naturopathic perspective as well as practical clinical applications for manual and physical approaches to health care. A wide range of bodywork and movement approaches and modalities are evaluated in relation to their ability to be appropriately used in naturopathic treatment and rehabilitation settings. Naturopathic methodology suggests that therapeutic measures should match the ability of the individual to respond positively without negative side effects. The model of care emphasised in this text recognizes that naturopathically oriented therapeutic interventions usually focus on achieving one or all of the following: Enhancement of function so that the person system or part can better self regulate in response to adaptive demands; Modification or removal of adaptive load factors; Symptomatic relief without creation of significant additional adaptive changes. This textbook evaluates and offers practical clinical approaches to manual and physical approaches to health care from naturopathic perspectives. Details clinical guidelines for combining naturopathic treatment and concepts with a wide range of bodywork, hydrotherapy and movement approaches in health care and rehabilitation settings. Presents evidence based information for management of musculoskeletal dysfunction, immune enhancement, circulatory and/or lymphatic stasis, respiratory dysfunction, chronic pain, sleep and fatigue problems and more, utilising naturopathic physical medicine approaches. Includes a history of the fundamental role of physical medicine in naturopathic practice in the early evolution of the profession. **California Manufacturers Register**, 1968 **Ebony**, 2004-03.
