Perspectives Claudia Navarini, Blaine Fowers, Juan Andrés Mercado ,Angelo Panno, Pía Valenzuela, 2025-04-01 Several authors i e Scheler Arnold Goldie Keltner and Ekman agree that traditionally in the history of Western thought emotions have been seen as enemies of rationality and disruptive of cooperative social relations However emotions guide our perceptions of the world our memories of the past and even our moral judgments of right and wrong most typically in ways that enable effective responses to the current situation For example studies find that when we are angry we are acutely attuned to what is unfair which helps animate actions that remedy injustice Emotions structure not just colour diverse social interactions such as attachment between parents and children flirtations and negotiations between rivals Thus emotions organize rather than disrupt rational thinking According to Arnold positive or negative we need to deal with emotions We need to think about them and what they tell us As Williams poses the moral significance of emotions reveals how fact and value come together in the moral agent Human beings capacity for ethics arises from the intersection between reason and emotion **Handbook**
