Foster, 2011-12 Why Amy E Foster asks did it take two decades after the Soviet Union launched its first female cosmonaut for the United States to send its first female astronaut into space In answering this question Foster recounts the complicated history of integrating women into NASA's astronaut corps NASA selected its first six female astronauts in 1978 Foster examines the political technological and cultural challenges that the agency had to overcome to usher in this new era in spaceflight She shows how NASA had long developed progressive hiring policies but was limited in executing them by a national agenda to beat the Soviets to the moon budget constraints and cultural ideas about women's roles in America Lively writing and compelling stories including personal interviews with America's first women astronauts propel Foster's account Through extensive archival research Foster also examines NASA's directives about sexual discrimination the technological issues in integrating women into the corps and the popular media's discussion of women in space Foster puts together a truly original study of the experiences not only of early women astronauts but also of the managers and engineers who helped launch them into space In documenting these events Foster offers a broader understanding of the difficulties in sexually integrating any workplace even when the organization approaches the situation with as positive an outlook and as strong a motivation as did NASA

Shayler,Colin Burgess,2020-07-10 Unofficially they called themselves the TFNG or the Thirty Five New Guys Officially they were NASA s Group 8 astronauts selected in January 1978 to train for orbital missions aboard the Space Shuttle Prior to this time only pilots or scientists trained as pilots had been assigned to fly on America s spacecraft but with the advent of the innovative winged spacecraft the door was finally opened to non pilots including women and minorities In all 15 of those selected were categorised as Pilot Astronauts while the other 20 would train under the new designation of Mission Specialist Altogether the Group 8 astronauts would be launched on a total of 103 space missions some flying only once while others flew into orbit as many as five times Sadly four of their number would perish in the Challenger tragedy in January 1986 In their latest collaborative effort the authors bring to life the amazing story behind the selection of the first group of Space Shuttle astronauts examining their varied backgrounds and many accomplishments in a fresh and accessible way through deep research and revealing interviews Throughout its remarkable 30 year history as the workhorse of NASA s human spaceflight exploration twice halted through tragedy the Shuttle fleet performed with magnificence So too did these 35 men and women swept up in the dynamic thrust and ongoing development of America s Space Shuttle program This book on the Group 8 Astronauts the TFNGs is an excellent summation of the individuals first selected for the new Space Shuttle Program It provides insight into what it took to first get the Space Shuttle flying For any space enthusiast it is a must read Robert L Crippen PLT on STS 1 As a reader I had many moments where long lost memories of the triumph and tragedy of the space shuttle program were brilliantly reawakened at the turn of a page Loved it This is a must have book for every space enthusiast s library TFNG Mission Specialist Astronaut Richard Mike Mullane author of *Riding Rockets The Outrageous Tales of a Space Shuttle Astronaut* Many of the anecdotes in the book brought back memories of challenges opportunities and a team of men and women who were committed not just to the space program but to one another I ve gone back to it several times as a reference source TFNG Steve Hawley 5 time Space Shuttle Mission Specialist Astronaut The TFNG book is incredible and amazingly thorough The detail in the book is awesome It is my go to book for any of the details I ve forgotten TFNG Dr Rhea Seddon 3 time Space Shuttle Mission Specialist Astronaut I can t believe how detailed and complete it is FANTASTIC work TFNG Robert L Hoot Gibson 5 time Space Shuttle Pilot Commander and former Chief of the NASA Astronaut Office

Flying Magazine ,1963-12 *Moon Bound* Colin Burgess,2013-03-12 Often lost in the shadow of the first group of astronauts for the Mercury missions the second and third groups included the leading figures for NASA s activities for the following two decades Moon Bound complements the author s recently published work *Selecting the*

Mercury Seven 2011 extending the story of the men who helped to launch human spaceflight and broaden the American space program Although the initial 1959 group became known as the legendary pioneering Mercury astronauts the astronauts of Groups 2 and 3 gave us many household names Sixteen astronauts from both groups traveled to the Moon in Project Apollo with several actually walking on the Moon one of them being Neil Armstrong This book draws on interviews to tell the astronauts personal stories and recreate the drama of that time It describes the process by which they were selected as astronauts and explains how the criteria had changed since the first group Moon Bound is divided into two parts recounting the biographies relating to the nine astronauts from NASA s Group 2 in the first part and the fourteen finalists in Group 3 in the second part The stories of both selection groups are narrated through the experiences of four finalists with interesting backgrounds One of these men is Al Rupp of the USAF who as a West Point cadet cheekily helped to steal the Navy mascot goat prior to the annual Army versus Navy game in 1953 thus achieving legendary status in the game s history Rupp was killed in a plane crash just two years after being named as a finalist for Group 3 The service career of naval aviator John Yamnicky was also very much the equal of other finalists but he was killed on September 11 2001 as he was a passenger on hijacked Flight 77 which was flown into the Pentagon At the end of the work there are several chapters on how these candidates were prepped for their missions **Magnificent Desolation** Buzz Aldrin, 2009-08-17

THE ESSENTIAL AUTOBIOGRAPHY OF THE SECOND MAN ON THE MOON _____ Thrilling years on the raw facts of the adventure remain beguiling and the bravery of the astronauts compelling SUNDAY TIMES Exciting and moving DAILY EXPRESS _____ Buzz Aldrin one of the three men who took part in the first moon landing in 1969 is a true American hero Magnificent Desolation begins with the story of his voyage into space which came within seconds of failure and reveals a fascinating insider s view of the American space programme But that thrilling adventure was only the beginning as Aldrin battled with his own desolation in the form of depression and alcoholism This epic journey encompasses the brutally honest tale of Aldrin s self destruction and the redemption that came through finding love when hope seemed lost _____ Buzz Aldrin might not have been the first man to walk on the Moon but of all the astronauts to have been there none of them has articulated their predicament with quite such wisdom and sensitivity MAIL
