the AIRS series aiming to bring together international researchers and developers to exchange new ideas and the latest results in information retrieval. The scope of the conference encompassed the theory and practice of all aspects of information retrieval in text audio image video and multimedia data. AIRS 2010 continued the conference series that grew from the Information Retrieval with Asian Languages IRAL workshop series started in 1996. It has become a mature venue for information retrieval work, and support from the ACM Special Interest Group on Information Retrieval SIGIR, the Association for Computational Linguistics and Chinese Language Processing ACLCLP, ROCLING and the Information Processing Society of Japan Special Interest Group on Information Fundamentals and Access Technologies IPSJSIG IFAT. This year saw a sharp rise in the number of submissions over the previous year. A total of 120 papers were submitted representing work by academics and practitioners not only from Asia but also from Australia Europe North America etc. The high quality of the work made it difficult for the dedicated program committee to decide which papers to feature at the conference. Through a double blind reviewing process 26 submissions 21% were accepted as full oral papers and 31 25% were accepted as short posters. The success of this conference was only possible with the support of all of the authors who submitted papers for review, the program committee members who constructively assessed the submissions and the registered conference delegates. We thank them for their support of this conference and for their long term support of this Asian centric venue for IR research and development.
