Big Intel recounts the dramatic story of the rise and Cold War heroics of the CIA and the American intelligence apparatus followed by its unfortunate slide into Marxist influenced Deep State dysfunction as BIG INTEL became BAD INTEL How the Left Subverted the CIA and FBI Once upon a time the FBI and the CIA fought America's enemies at home and abroad Now they are tools of a growing police state attacking the left's political enemies and spying on ordinary American citizens even parents who push back against radical public schools How did we get here In this revealing and thoroughly documented book a former CIA operative traces the origins of Big Intel to a loose network of Marxist academic agitators known as the Frankfurt School Their ideology appealed to the Ivy League elites populating the CIA but the subversion of the FBI took longer impeded for a time by the bureau's staunchly anti Communist director J Edgar Hoover Eventually both institutions succumbed and today Big Intel is controlled by the cultural Marxists Chronicling the parasitic infiltration of the CIA and FBI Big Intel shows how normal intelligence functions have given way to political correctness and never ending pride propaganda trapping agents in the diversity equity and inclusion house of mirrors Most chilling of all is the emergence of the leftist security state Big Intel has become Bad Intel There are hard times ahead but if Americans remember what freedom once was we can still defang Big Intel and return our intelligence services to the service of democracy

*Legal Secrets* Kim Lane Scheppele, 1988 Does the seller of a house have to tell the buyer that the water is turned off twelve hours a day Does the buyer of a great quantity of tobacco have to inform the seller that the military blockade of the local port which had depressed tobacco sales and lowered prices is about to end Courts say yes in the first case no in the second How can we understand the difference in judgments And what does it say about whether the psychiatrist should disclose to his patient's girlfriend that the patient wants to kill her Kim Lane Scheppele answers the question Which secrets are legal secrets and what makes them so She challenges the economic theory of law which argues that judges decide cases in ways that maximize efficiency and she shows that judges use equality as an important principle in their decisions In the course of thinking about secrets Scheppele also explores broader questions about judicial reasoning how judges find meaning in legal texts and how they infuse every fact summary with the values of their legal culture Finally the specific insights about secrecy are shown to be

consistent with a general moral theory of law that indicates what the content of law should be if the law is to be legitimate a theory that sees legal justification as the opportunity to attract consent This is more than a book about secrets It is also a book about the limits of an economic view of law Ultimately it is a work in constructive legal theory one that draws on moral philosophy sociology economics and political theory to develop a new view of legal interpretation and legal morality
