

FORMATIVE ASSESSMENT: PROPERTIES OF WATER/pH scale

Name: _____ Teacher: _____ Date: _____

Learning Goals:

Students will be able to:

Understand how water supports life.

Understand the pH scale and how relates to acids and bases.

Score 2:

- Water droplets form by water molecules being attracted to each other. What term best explains this behavior?
 - adhesion
 - cohesion
 - solubility
 - magnetism
- Which property of water allows water to stick to the sides of the straw?
 - adhesion
 - cohesion
 - heat capacity
 - solubility
- Which property of water allows bugs to walk on water?
 - adhesion
 - heat capacity
 - surface tension
 - solubility
- Water takes _____ heat to change to its gaseous state.
 - large amounts of
 - small amounts of
 - no
- What property of water allows sweat to cool the body & coastal cities to have more moderate temperatures than inland cities?
 - High heat capacity
 - Neutral pH of 7
 - Surface tension and capillary action
 - Universal solvent
- A solution with a pH of 3 is:
 - acidic
 - basic
 - neutral
- A solution with a pH of 8 is:
 - acidic
 - basic
 - neutral

Score 3:

- Water is a polar molecule because
 - It shares electrons equally between oxygen and hydrogen
 - One side of the molecule has a slight positive charge and the other side has a slight negative charge
 - It freezes at zero degrees Celsius
 - It forms hydrogen bonds with other water molecules
- Which side of the water molecule has a slight negative charge?
 - oxygen side
 - hydrogen side

Water in a Changing World World Water Assessment Programme (United Nations), UN-Water, Unesco, 2009-01-01 The United Nations World Water Development Report published every three years is a comprehensive review providing an authoritative picture of the state of the world's freshwater resources. It offers best practices as well as in-depth theoretical analyses to help stimulate ideas and actions for better stewardship in the water sector. It is the only report of its kind resulting from the collaboration and contributions of the 26 UN agencies, commissions, program funds, secretariats, and conventions that have a significant role in addressing global water concerns. *Selected Water Resources Abstracts*, 1972

The United Nations World Water Development Report 3 World Water Assessment Programme, 2012-05-23 The United Nations World Water Development Report published every three years is a comprehensive review providing an authoritative picture of the state of the world's freshwater resources. It offers best practices as well as in-depth theoretical analyses to help stimulate ideas and actions for better stewardship in the water sector. It is the only report of its kind resulting from the collaboration and contributions of the 26 UN agencies, commissions, program funds, secretariats, and conventions that have a significant role in addressing global water concerns. The news media are full of talk of crises in climate change, energy, and food, and troubled financial markets. These crises are linked to each other and to water resources management. Unresolved, they may lead to increasing political insecurity and conflict. Water is required to meet our fundamental needs and rising living standards and to sustain our planet's fragile ecosystems. Pressures on the resource come from a growing and mobile population, social and cultural change, economic development, and technological change. Adding complexity and risk is climate change with impacts on the resource as well as on the sources of pressure on water. The challenges, though substantial, are not insurmountable. The Report shows how some countries have responded. Progress in providing drinking water is heartening with the Millennium Development Goal target on track in most regions. But other areas remain unaddressed, and after decades of inaction, the problems in water systems are enormous and will worsen if left unattended. Leaders in the water sector can inform decisions outside their domain and manage water resources to achieve agreed socioeconomic objectives and environmental integrity. Leaders in government, the private sector, and civil society determine these objectives and allocate human and financial resources to meet them. Recognizing this responsibility, they must act now.
