comprehensive resource for understanding the history as well as the current status of educational practices in Singapore. It is a one-stop reference guide to education and educational issues. There are three sections. Part 1 provides a sectorial overview of how education has been organized in this country, such as preschool, special needs, primary and secondary, and adult education divisions. In Part 2, contributors critically delve into issues and policies that are pertinent to understanding education here, such as underachievement, leadership, language education, assessment, and meritocracy, to question what Part 1 might have taken for granted. Part 3 contains the largest number of contributors because it offers a scholarly examination into specific subject histories. This section stands out because of the comparative rarity of its subject matter: history of Physical Education, Art, Music, Geography, Education, etc. in Singapore.
