Green,2008-03-20 Making Women s Medicine Masculine challenges the common belief that prior to the eighteenth century men were never involved in any aspect of women s healthcare in Europe Using sources ranging from the writings of the famous twelfth century female practitioner Trota of Salerno all the way to the great tomes of Renaissance male physicians and covering both medicine and surgery this study demonstrates that men slowly established more and more authority in diagnosing and

prescribing treatments for women's gynaecological conditions especially infertility and even certain obstetrical conditions. Even if their hands-on knowledge of women's bodies was limited by contemporary mores, men were able to establish their increasing authority in this and all branches of medicine due to their greater access to literacy and the knowledge contained in books whether in Latin or the vernacular. As Monica Green shows, while works written in French, Dutch, English, and Italian were sometimes addressed to women, nevertheless, even these were often re-appropriated by men, both by practitioners who treated women and by laymen interested to learn about the secrets of generation. While early in the period women were considered to have authoritative knowledge on women's conditions, hence the widespread influence of the alleged authoress Trotula, by the end of the period to be a woman was no longer an automatic qualification for either understanding or treating the conditions that most commonly afflicted the female sex, with implications of women's exclusion from production of knowledge on their own bodies extending to the present day.

Beauty in Sufism Kazuyo Murata, 2017-04-05 Analyzes the place of beauty in the Sufi understanding of God, the world, and the human being through the writings of Sufi scholar and saint Rabi' al-Adri al-Baqli. According to Muhammad, God is beautiful and He loves beauty. Yet Islam is rarely associated with beauty, and today a politicized Islam dominates many perceptions. This work tells a forgotten story of beauty in Islam through the writings of celebrated but little studied Sufi scholar and saint Rabi' al-Adri al-Baqli (1128-1209). Rabi' al-Adri argued that the pursuit of beauty in the world and in oneself was the goal of Muslim life. One should become beautiful in imitation of God and reclaim the innate human nature created in God's beautiful image. Rabi' al-Adri's theory of beauty is little known, largely because of his convoluted style and eccentric terminology in both Persian and Arabic. In this book, Kazuyo Murata revives Rabi' al-Adri's ideas for modern readers. She provides an overview of Muslim discourse on beauty before Rabi' al-Adri's time, an analysis of key terms related to beauty in the Qur'an and in Rabi' al-Adri's writings, a reconstruction of Rabi' al-Adri's understanding of divine, cosmic, and human beauty, and a discussion of what he regards as the pinnacle of beauty in creation: the prophets, especially Adam, Abraham, Joseph, Moses, and Muhammad.

The History of Chemistry (Vol.1&2) Thomas Thomson,2020-08-29 The History of Chemistry spans a period from very old times to the modern era Since several millennia BC civilizations were using technologies that would eventually form the basis of the various branches of chemistry Chemistry was preceded by its protoscience alchemy which is an intuitive but non scientific approach to understanding the constituents of matter and their interactions It was unsuccessful in explaining the nature of matter and its transformations but by performing experiments and recording the results alchemists set the stage for modern chemistry While both alchemy and chemistry are concerned with matter and its transformations the crucial difference was given by the scientific method that chemists employed in their work Chemistry is considered to have become an established science with the work of Antoine Lavoisier who developed a law of conservation of mass that demanded careful measurement and quantitative observations of chemical phenomena The object of this work is to present a comprehensive overview of the progress of chemistry from its first rude and modest beginnings till it has reached its modern state of importance as one of the leading sciences
