### Questions:

Who are the new patrons as we move into the 15<sup>th</sup> century? How is that different from the patrons of the Middle Ages? What is one example of the way that this celebration of man can be seen in the world of art?

Given an example of continuity in the type and style of art that connects the late Middle Ages and the 15<sup>th</sup> century.

Holbein's *The Ambassadors* contains quite a bit of symbolism that expresses the erudition and the prosperity of the patron. Give two examples of this.

Holbein's *The Ambassadors* also contains a powerful message about the current state of religion at the court of Henry VIII. What is this message and what symbols are used to convey it?

Skulls are a fairly conventional symbol of death. How is the anamorphosis of the skull in Holbein's *The Ambassadors* connect to the meaning of this symbol?

Panofsky argues that the *Arnolfini Portrait* records a marriage contract. What are two of his three pieces of evidence that support this idea?

Panofsky then goes on to use some of the disguised symbols in this picture to support that idea. Be able to discuss two of those disguised symbols.

What is the use of the mirror according to Panofsky? Who is shown in it? And what is their purpose?

Margaret Koster offers a completely different interpretation of the *Arnolfini Portrait*. What is the biggest discovery that she made which forces a new interpretation? Discuss one of the disguised symbols that she uses to further support her thesis.

How does Koster deal with the mirror?

How is oil paint different from tempera in terms of

Sterling, 2025-07-04 For hundreds of thousands of years the story of human success was the story of a unique and powerful package In what this groundbreaking book calls the era of the Bundled Ape our ancestors dominated the planet by combining analytical intelligence emotional connection and physical dexterity within a single vessel the individual human Our societies economies and even our myths were built on the assumption that the person with the idea is also the one who feels the passion directs the hands and experiences the consequences Now that bundle is coming apart In *The Great Unbundling* the

author presents a stunning new thesis for understanding our turbulent times The true disruption of artificial intelligence is not that it s a new tool but that it is the engine of a historical process that is systematically isolating each of our core functions improving them beyond human capacity and rendering the original human package obsolete This unbundling is being driven at a breakneck pace by the relentless profit seeking engine of modern capitalism which sees in AI the ultimate instrument for maximizing efficiency The evidence is everywhere The Unbundling of Labor Generative AI is poised to automate or degrade the work of 300 million full time employees striking at the heart of the knowledge economy from law and finance to journalism and medicine The Unbundling of Intelligence For the first time raw problem solving capability is being divorced from conscious understanding An AI can pass the medical licensing exams without knowing what it means to heal or ace the bar exam without a concept of justice forcing us to ask what expertise truly means The Unbundling of Connection In an age of profound loneliness AI is stepping in to meet our most fundamental needs With AI companions parasocial relationships and algorithmically curated communities emotional fulfillment is being unbundled from the messy unpredictable and deeply rewarding work of human to human connection What happens to a species whose core evolutionary advantage has been deconstructed and outsourced What is the economic value of a human being in a world where our bundled skills are no longer competitive This leads to the crisis of humanism itself and forces us to consider radical solutions like Universal Basic Income not as a political choice but as a potential civilizational necessity in the face of a useless class But this is not another prophecy of doom The unbundling is not an endpoint but a turning point The Great Unbundling is the first book to chart the powerful counter current that is rising in response The Great Re bundling This is the story of the conscious human effort to forge a new purpose From the new artisans who are building thriving businesses on the very integrated authentic human skills that AI cannot replicate to the political movements and policymakers fighting to subordinate this new technology to human values a new path is being forged The Great Unbundling is a profound deeply researched and ultimately hopeful guide to the most important transition of our lifetime It provides the essential framework for understanding the forces reshaping our world and offers a stirring vision for how we can actively create our future This provocative and insightful work argues that we are at a civilizational crossroads We can either passively accept our unbundling or begin the conscious creative and difficult work of forging a new human purpose Essential reading for aficionados of Yuval Noah Harari Nick Bostrom and Kai Fu Lee The Great Unbundling is sure to spark debate and will forever change how you think about the future of humanity

**Renaissance Fun** Philip Steadman, 2021-04-13 Renaissance Fun is about the technology of Renaissance entertainments in stage machinery and theatrical special effects in gardens and fountains and in the automata and self playing musical instruments that were installed in garden grottoes How did the machines behind these shows work How exactly were chariots filled with singers let down onto the stage How were flaming dragons made to fly across the sky How were seas created on stage How did mechanical birds imitate real birdsong What was artificial music three centuries before Edison and the phonograph How could pipe organs be driven and made to play themselves by waterpower alone And who were the architects engineers and craftsmen who created these wonders All these questions are answered At the end of the book we visit the lost garden of marvels at Pratolino with its many grottoes automata and water jokes and we attend the performance of Mercury and Mars in Parma in 1628 with its spectacular stage effects and its music by Claudio Monteverdi one of the places where opera was born Renaissance Fun is offered as an entertainment in itself But behind the show is a more serious scholarly argument centred on the enormous influence of two ancient writers on these subjects Vitruvius and Hero Vitruvius's Ten Books on Architecture were widely studied by Renaissance theatre designers Hero of Alexandria wrote the Pneumatics a collection of designs for surprising and entertaining devices that were the models for sixteenth and seventeenth century automata A second book by Hero On Automata Making much less well known then and now describes two miniature theatres that presented plays without human intervention One of these it is argued provided the model for the type of proscenium theatre introduced from the mid sixteenth century the generic design which is still built today As the influence of Vitruvius waned the influence of Hero grew

**Architecture and the Arts and Crafts Movement in Boston** Maureen Meister, 2003 H Langford Warren 1857 1917 was an important link in the chain of individuals who contributed to the architectural practice theories of design and the teaching of architectural history in the United States at the turn of the twentieth century Best known in the Boston area Warren first worked under the renowned architect Henry Hobson Richardson before establishing his own practice Friends and colleagues during this period included Charles Eliot Norton the noted art historian and Harvard's Charles Herbert Moore a leading Ruskinian painter Hired by Harvard University in 1893 Warren developed its architectural curriculum In 1897 he helped found Boston's Society of Arts and Crafts At the time of his death in 1917 Warren was Dean of the School of Architecture at Harvard and President of the Society of Arts and Crafts At the turn of the century Warren's philosophical vision offered a conservative and ethnocentric perspective attractive to many Bostonians and to a significant segment of Americans nationwide According to this view English culture was the basis of American culture Through his work at Harvard and in the Arts and Crafts movement he articulated and promoted an aesthetic guided by an attachment to the past and he encouraged his students at Harvard to revive and reinterpret English and Anglo American models Another characteristic of Warren's aesthetic was restraint a quality generally attributed to the

region's Puritan settlers. Restraint also meant a rejection of both the lavish ornamentation of the Ecole des Beaux Arts in Paris and the more original styles such as Art Nouveau that were emerging at the turn of the century. Following the ideals of John Ruskin, William Morris, and later leaders of the English Arts and Crafts movement, Warren and his architect colleagues promoted a close collaboration with the craftsmen who enhanced their buildings. The resulting building designs represent a significant contribution to the development of American Arts and Crafts architecture, complementing the proto-modern work of designers such as Frank Lloyd Wright. In fact, Arts and Crafts architecture in North America was extremely diverse. Meister examines the greater complexity of this architecture by exploring the eclectic historicism of Warren, a key figure in the movement that was centered in Boston.
