dissection of what has worked less well and what hasn't worked at all Paul Farmer from the foreword The field of global  
health has roots in the AIDS pandemic of the late 20th century when the installation of health care systems supplanted older

**Metaphysics and Adoption of Substantial Forms** Adrian Nita, 2015-07-01 This anthology is about the signal change in  
Leibniz's metaphysics with his explicit adoption of substantial forms in 1678-79 This change can either be seen as a moment  
of discontinuity with his metaphysics of maturity or as a moment of continuity such as a passage to the metaphysics from his  
last years Between the end of his sejour at Paris November 1676 and the first part of the Hanover period Leibniz reformed  
his dynamics and began to use the theory of corporeal substance This book explores a very important part of the  
philosophical work of the young Leibniz Expertise from around the globe is collated here including Daniel Garber's work  
based on the recent publication of Leibniz's correspondence from the late 1690s examining how the theory of monads  
developed during these crucial years Richard Arthur argues that the introduction of substantial forms reinterpreted as  
enduring primitive forces of action in each corporeal substance allows Leibniz to found the reality of the phenomena of  
motion in force and thus avoid reducing motion to a mere appearance Amongst other themes covered in this book Pauline  
Phemister's paper investigates Leibniz's views on animals and plants highlighting changes modifications and elaborations

over time of Leibniz's views and supporting arguments and paying particular attention to his claim that the future is already contained in the seeds of living things The editor Adrian Nita contributes a paper on the continuity or discontinuity of Leibniz's work on the question of the unity and identity of substance from the perspective of the relation with soul anima and mind mens
