Ryan, 2012-10-01

Once the province and tool of elite learning in American society and the core of the Humanities the study of the Classics now occupies a tenuous place on the margins of curriculum in most public schools Administrators of schools and districts with limited resources teachers and students of ancient Greek and Roman culture and language confront many questions regarding the relevance and utility of including the Classics in education that must address modern challenges In this book Toni Ryan argues that the Classics provide students with a uniquely wide range of opportunities for critical examination of the connections among language cultural constructions of power and knowledge and oppression in society She proposes rationale for incorporating a critical approach to classical studies in American public schools as a path to exploring social justice issues Critical pedagogy in Classics offers a platform for illuminating paths for critical awareness reflection and action in the quest to understand and address the broad concerns of social justice Ryan asserts the potential for education in Classics to be reconstructed to empower and emancipate particularly through the exploration of philosophical questions that have been pondered in classical cultures and in classical studies since antiquity For public school educators and students the examination of classical language and culture allows us to safely explore critical questions in an admittedly unsafe world Those questions that are eternally ours

that are eternally centered in the human condition are the province of Classics *The Study of Second Language Acquisition in the Asian Context*, 2007 This book will be of special interest to English teachers and those in professional development in the region and or who have classrooms with Asian learners Paradigms appear to be shifting in Asian L2 learning in a region providing huge growth in English education This will have an important bearing on the profession including researchers worldwide **Foreign Language Writing Instruction** Tony Cimasko, Melinda Reichelt, 2011-06-23 Fourteen chapters researched and authored by scholars working in nine different countries and regions explore the contexts of foreign language writing pedagogy the diversity of national and regional approaches the role of universities departments and programs in pedagogy and the cognitive and classroom dimensions of teaching and learning Enhancing Beginner-Level Foreign Language Education for Adult Learners Ekaterina Nemtchinova, 2022-12-30 This book is an authoritative text that explores best classroom practices for engaging adult learners in beginner level foreign language courses Built around a diverse range of international research studies and conceptual articles the book covers four key issues in teaching language to novice students development of linguistic skills communicative and intercultural competence evaluation and assessment and the use of technology Each chapter includes teaching insights that are supported by critical research and can be practically applied across languages to enhance instructional strategies and curriculum designs The text also aims to build intercultural competence harness technology and design assessment to stimulate effective learning in formal instructional settings including colleges universities and specialist language schools With its broad coverage of language pedagogy at the novice level this book is a must read for graduate students scholars researchers and practitioners in the fields of language education second language acquisition language teaching and learning and applied linguistics

Teachers of Multiple Languages Eric K. Ku, 2023-09-04 This book argues that teachers of multiple languages TMLs form a distinct group of language teachers and that the study of this largely overlooked demographic group can reveal new insights into how we perceive and research language teachers The book highlights the narratives of three TMLs from diverse global contexts examining their journeys in navigating their careers as well as traversing multiple worlds and developing additional ways of being through new identities beliefs and emotions The author offers new globally relevant insights for language teaching research at individual pedagogical and institutional level and demonstrates that teaching multiple languages is an emerging transnational phenomenon that cuts across age languages countries institutions and career stages By furthering our understanding of why and how some multilingual language teachers have expanded and changed their careers through teaching additional languages the book offers a new perspective on how language teaching careers are changing in an increasingly globalized multilingual world
