

Prompt 2

30 minutes

Directions:

The following assignment requires you to use information from two sources to discuss concerns that relate to a specific issue. When paraphrasing or quoting from the two sources, cite each source used by referring to the author's last name, the title, or any other clear identifier.

Assignment:

Read the two passages carefully and then write an essay in which you identify the most important concerns regarding the issue and explain why they are important. Your essay must draw on information from BOTH of the sources. In addition, you may draw on your own experiences, observations, or readings. Be sure to CITE the sources whether you are paraphrasing or directly quoting.

Coronavirus makes voting by mail even more important

Less than five months until Election Day, there's a surprisingly fierce debate over mail-in balloting, driven largely by an unpopular president apparently worried that too many people will cast votes.

But Trump's outbursts about the issue don't stand up to even casual scrutiny. The fact is, Trump himself votes by mail. All 50 states allow it to some degree.

A pandemic makes mail-in voting even more important. In April, after the Wisconsin Supreme Court blocked the governor's effort because of the pandemic, people still braved the polls in record numbers. Disease voting is person contracted COVID-19.

Since the coronavirus outbreak, election officials across the country have expanded access to absentee voting for primaries.

But Trump continues to make false allegations that states are sending mail-in ballots to noncitizens or people who aren't registered to vote.

This hand-wringing would be laughable if Trump wasn't thus sticking to "hold up" federal funding where battleground states are increasing voting by mail. The Republican Party is treating millions as challenges to vote-by-mail initiatives.

The reality is that mail voting is poised to be a crisis, and the risks of fraud are tiny. A Washington Post analysis this month showed that in these vote-by-mail states, there were 172 questionable ballots out of 14.6 million cast, or 0.0011%.

To be sure, states need to adopt adequate safeguards as they race to expand mail voting. Ballot return envelopes should require the voter's signature and include a unique bar code.

Essays in Post-Critical Philosophy of Technology Mihály Héder, Eszter Nádasi, 2019-02-15 Technology in all its forms has had and continues to have an

indisputable impact on society and culture Philosophy of technology seeks to understand this impact and the meaning of technology for society and culture Although its origins can be traced back to the Greeks it wasn't until the late 19th century to the beginning of the 20th century that it gained ground as a philosophical discipline Now more than ever it is considered an essential philosophical enterprise The Budapest Workshop on Philosophy of Technology was a lively and successful event that sought to discuss reflect on and apply this branch of philosophical inquiry to both historical and contemporary examples Importantly the contributors methodological approaches were influenced by although not limited to Michael Polanyi's term post critical Moving beyond the rigidity of past approaches the selected essays were driven by two lines of inquiry what has been the historical role of technology in social and scientific change And how can a post critical approach enhance and extend our understanding of philosophy of technology This edited volume begins by exploring the role of technology in social and scientific developments from a historical perspective before moving towards a discussion of philosophy of technology from a Post Critical epistemic stance Free from the constraints of previous methodologies the third part of this work engages with the term Post Critical in its broadest sense The contributors to this section consider the phenomenology of the body and the influence of technology on our lives Finally the four concluding chapters of this book apply this philosophical approach to a wide range of contemporary problems from Decision Support Systems to Crisis Communication Kaplan PRAXIS ,2004
