*I learned numbers, I learned shapes
I learned purple stands for grapes
I've made friends and learned to share
What is wrong and what is fair
I learned what policeman & mailman do
Nurses and fireman too!
I learned rhymes, I learned sounds
I've had ups and I've had downs
We've worked all year for this degree
Now aren't you proud of ME!
So with happy memories
We send them out the door
With great hope and expectations
For what next year holds in store.*

STEM Models of Success J. Luke Wood, Robert T. Palmer, 2014-03-01 As the U S focuses on positioning itself to retain and advance its status as a world leader in technology and scientific innovation a recognition that community colleges are a critical site for intervention has become apparent Community colleges serve the lion's share of the nation's postsecondary students In fact 40% of all undergraduate students are enrolled in community colleges these students account for nearly 30% of all STEM undergraduate majors in postsecondary institutions These students serve as a core element of the STEM pipeline into four year colleges and universities via the community college transfer function Moreover community colleges are the primary postsecondary access point for non traditional students including students of color first generation low income and adult students This is a particularly salient point given that these populations are sordidly underrepresented among STEM graduates and in the STEM workforce Increasing success among these populations can contribute significantly to advancing the nation's interests in STEM As such the community college is situated as an important site for innovative practices that have strong implications for bolstering the nation's production and sustenance of a STEM labor force In recognition of this

role the National Science Foundation and private funding agencies have invested millions of dollars into research and programs designed to bolster the STEM pipeline From this funding and other independently sponsored inquiry promising programs initiatives and research recommendations have been identified These efforts hold great promise for change with the potential to transform the education and outcome of STEM students at all levels This important book discusses many of these promising programs initiatives and research based recommendations that can impact the success of STEM students in the community college This compilation is timely on the national landscape as the federal government has placed increasing importance on improving STEM degree production as a strategy for America s future stability in an increasingly competitive global marketplace Informed by research and theory each chapter in this volume blazes new territory in articulating how community colleges can advance outcomes for students in STEM particularly those from historically underrepresented and underserved communities

Higher Education at Risk Sandra

Featherman,2023-07-03 Sandra Featherman believes that colleges are in denial about the severity of the threats to the current model of higher education Based on her own experience as a president as a trustee and as a board member who has worked in private and public universities and on interviews with the presidents of major institutions she offers both a trenchant analysis of those threats and clear prescriptions about the painful but necessary decisions that colleges need to make to ensure they remain viable accessible and affordable and deliver a high quality education Sandra Featherman considers higher education to be at a game changing moment When markets don't function well as is the case with today's college marketplace with offerings that cost too much and return too little it opens the door to new types of suppliers who offer new ways of providing what students are looking for particularly the increasing cohort of mature working students In the face of new competitors for profit education companies technology start ups and foreign universities vying for international students trustees and senior level administrators are generally stuck in a traditional ethos and with decision making processes unsuited to these times They know what used to work and find it easier to follow old ways than to make the difficult transition to new ways of delivering education She lays out a strategy that emphasizes the centrality of students and how to provide them with the most effective learning environment that is clear eyed about focusing on the core missions and abandoning practices that constrain or impede them and that requires constant self monitoring to learn from and act upon what works She offers a blueprint for redesigning institutions for paring away what is unnecessary and cost ineffective and for adopting the best technologies all in the service of developing meaningful degree programs at an affordable price and widening access for under represented groups She ranges over the implications of budget decisions accreditation and MOOCs addresses government regulation and tuition costs presents promising new models and concludes with 11 key recommendations that should be heeded by all higher education administrators and trustees

The Death of "Why?"

Andrea Batista Schlesinger,2009-06-26 A look at how Americans are losing their sense of curiosity and skepticism and how some are working to change that The spirit of inquiry is the engine of democracy The democratic process is nothing less than citizens regularly asking what kind of society they want to live in and whom they want to lead them But more and more people are avoiding the whole messy business of questioning Americans are instead being trained to look for ready made answers with potentially dire implications for the health of our society In this impassioned new book Andrea Batista Schlesinger argues that we're besieged by cultural forces that urge us to avoid independent thought and critical analysis The media reduces politics to a spectator sport focusing on polls and personalities rather than issues and ideas Schools teach to standardized tests students learn to fill in the bubbles not open their minds Financial literacy courses have replaced civics classes graduating smart shoppers rather than informed citizens Even the Internet promotes habits that discourage inquiry

Regurgitating search engine results becomes a substitute for genuine research and reflection Social networks promote connection rather than engagement With all the information available online over a third of those younger than twenty five say they get no news on a typical day up from twenty five percent in 1998 The situation isn't hopeless Batista Schlesinger spotlights individuals and institutions across the country that are working to renew a healthy sense of curiosity and skepticism particularly in American's youth It is at this point an uphill battle but one well worth undertaking The Death of Why offers both a penetrating socio cultural critique of our current path and a way forward for cultivating inquiry and reinvigorating our democracy From her start in politics as a teenager Andrea Batista Schlesinger has asked the important questions Now she asks her most important are we teaching young people to value inquiry and if not what hope can we have for the future of democracy Katrina vanden Heuvel Publisher The Nation The Death of Why makes the case that we cannot create social change without a culture of questioning We should pay close attention to this brilliant contribution Deepak Bhargava executive director Center for Community Change She asks the right questions at a time when we seem more eager for answers that we don't understand or care about Deborah Meier Senior Scholar New York University author of In Schools We Trust and The Power of Their Ideas and founder of innovative New York and Boston area public schools Tutoring: Complete Home Business Guide Kimberly Fujioka,2013 This first chapter starts with this quote Tutoring and Test Preparation is Booming according to the U S Industry Report in 2010 According to industry records tutoring is a business that is in constant demand So why not become a tutor In this book you will learn how This 32 chapter practical reference guide will help you start a successful tutoring business The types of tutoring outlined are in person and online Three chapters highlight the online field The Table of Contents below will give you an idea of the book Table of Contents Part I Tutoring as a Business Chapter 1 Tutoring is a Booming Business Chapter 2 Tutoring in Your Home vs Regular Employment Chapter 3 Defining Your Goals Chapter 4 What Subjects Should You Tutor Chapter 5 Develop Your Business with Six Tools Chapter 6 Your Hourly Rate Chapter 7 Tutoring Online to Make More Money Chapter 8 The Virtual Classroom How to Tutor Online Chapter 9 Offering One Free Introductory Tutoring Session Chapter 10 Make Your Own Website Easily and for Free Chapter 11 Getting Ready to Accept Calls From Parents Chapter 12 Preparing For Your First Tutoring Session Chapter 13 Involve your Students in the Goal Setting Chapter 14 Building Regular Monthly Income from Students Chapter 15 Building Your Tutoring Business with No Money Chapter 16 Building Your Tutoring Business Using Paid Advertising Part II Tutoring International People Whose First Language is not English or ESL English as a Second Language Chapter 17 What is an ESL Student Chapter 18 Your First Meeting with the ESL Student Chapter 19 Tips for Speaking with ESL Students Chapter 20 The Lesson Plan Chapter 21 Assessing your student's English Ability Chapter 22 Teaching the Beginner Chapter 23 Teaching ESL at their Level Using Questions Chapter 24 Teaching ESL Using Pictures Chapter 25 Teaching Pronunciation Chapter 26 Teaching with Podcasts Chapter 27 Lesson Getting to Know Each Other Chapter 28 Teaching Listening Skills with Audio
