

The Next question is on prisms and you will be asked to calculate the refractive index of prism and the deviating power of a prism in prism dioptres.

A prism has the following parameters:

Apical angle = 5 degrees

Deviation of light beam = 4 degrees

#### Part a

Calculate the refractive index of the prism

Using  $d = (n-1)a$  we will re-arrange this formula to find n

now we can add the variables available to us

as the 5 is a multiplication we can take it across to the other side and it will become a division factor.

as the brackets have been taken away we can now take the minus 1 across to the other side and it will become plus 1

**= refractive index of the prism**

#### Part b

Find the deviating power in prism dioptres ( $\Delta$ ) of the above prism in **part a**

## Embracing the Tune of Expression: An Psychological Symphony within **Practice B10 2 Practice Of Prism**

In a global used by screens and the ceaseless chatter of fast conversation, the melodic elegance and emotional symphony developed by the published term usually disappear in to the back ground, eclipsed by the constant noise and interruptions that permeate our lives. But, located within the pages of **Practice B10 2 Practice Of Prism** a wonderful literary value brimming with raw feelings, lies an immersive symphony waiting to be embraced. Constructed by a wonderful composer of language, this interesting masterpiece conducts viewers on a mental journey, well unraveling the hidden melodies and profound affect resonating within each cautiously crafted phrase. Within the depths of this emotional examination, we shall investigate the book is main harmonies, analyze their enthralling writing fashion, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
