Priestley, 2012-12-06 This book is for students being introduced to calculus and it covers the usual topics but its spirit is different from what might be expected Though the approach is basically historical in nature emphasis is put upon ideas and their place not upon events and their dates Its purpose is to have students to learn calculus first and to learn incidentally something about the nature of mathematics Somewhat to the surprise of its author the book soon became animated by a spirit of opposition to the darkness that separates the sciences from the humanities To fight the spell of that darkness anything at hand is used even a few low tricks or bad jokes that seemed to offer a slight promise of success To lighten the darkness to illuminate some of the common ground shared by the two cultures is a goal that justifies almost any means It is possible that this approach may make calculus more fun as well Whereas the close ties of mathematics to the sciences are well known the ties binding mathematics to the humanities are rarely noticed The result is a distorted view of mathematics placing it outside the mainstream of liberal arts studies This book tries to suggest gently from time to time where a kinship between mathematics and the humanities may be found **Bird's Engineering Mathematics** John Bird, 2021-03-15 Now in

its ninth edition Bird's Engineering Mathematics has helped thousands of students to succeed in their exams. Mathematical theories are explained in a straightforward manner supported by practical engineering examples and applications to ensure that readers can relate theory to practice. Some 1 300 engineering situations/problems have been flagged up to help demonstrate that engineering cannot be fully understood without a good knowledge of mathematics. The extensive and thorough topic coverage makes this a great text for a range of level 2 and 3 engineering courses such as for aeronautical construction, electrical, electronic, mechanical, manufacturing engineering and vehicle technology including for BTEC First National and Diploma syllabuses, City Guilds Technician Certificate and Diploma syllabuses and even for GCSE and A level revision. Its companion website at www.routledge.com/cw/bird provides resources for both students and lecturers including full solutions for all 2 000 further questions, lists of essential formulae, multiple choice tests and illustrations as well as full solutions to revision tests for course instructors.
