The Dilemma of Utility Maximization: A Critical Evaluation of Consumption Choices

Introduction:

In this case analysis, we delve into the complexities of utility maximization and its impact on consumption choices. Our protagonist, Emily, is a young professional with diverse preferences and budget constraints. This analysis aims to understand how Emily can achieve the highest level of satisfaction with her limited budget. By examining key concepts such as total utility, marginal utility, and their interplay with income and prices, we aim to uncover the best allocation strategy for her consumption choices.

Scenario Overview

Emily has \$60 to spend on two goods: books and video games. The prices and corresponding utilities are provided. The challenge is to determine the optimal combination of books and video games that maximizes her satisfaction. The following data summarizes the total and marginal utility for both goods:

- **Books:** \$10 per book
- **Video Games:** \$15 per game
