

## Notes on Slope, Distance, and Midpoint

### • Slope of a Straight Line

One of the most important properties of a straight line is in how it angles away from the horizontal. This concept is reflected in something called the "slope" of the line.

Let's take a look at the straight line:

$y = \frac{2}{3}x - 4$ . The graph is at the right:

- To find the slope of the line, we will need two points from that line.

Let's pick:  $\begin{matrix} x_1 & y_1 & x_2 & y_2 \\ (0, -4) & (6, 0) \end{matrix}$

Remember:  $\Delta y / \Delta x = -4 / 6 = -2 / 3$

A formula is:  $\frac{y_1 - y_2}{x_1 - x_2}$

$$\frac{-4 - 0}{0 - 6} = \frac{-4}{-6} = \frac{2}{3}$$

will also see it as:  $\frac{y_2 - y_1}{x_2 - x_1} = \frac{0 - -4}{6 - 0} = \frac{4}{6} = \frac{2}{3}$

Petrosino, Candace Walkington, Denise Ekberg, 2024-01-01 Frameworks for Integrated Project Based Instruction in STEM Disciplines presents an original approach to Science Technology Engineering and Mathematics STEM centric project based instruction. We approach project based instruction from an engineering design philosophy and the accountability highlighted in a standards based environment. We emphasize a backward design that is initiated by well defined outcomes tied to local, state or national standards that provide teachers with a framework guiding students' design, solving or completion of ill defined tasks. In project based STEM classrooms, students investigate, utilize technological tools, construct artifacts, participate in debates, collaborate and make products to demonstrate what they have learned. Features include deep coverage of four topics in PBI scaffolding, student driven inquiry, driving questions and development of lessons based on national and state standards. This focus will ensure a deep understanding by the reader of project based instruction which will allow the reader to create strong and meaningful lesson experiences for their students. An emphasis on student driven inquiry will be discussed, including the importance of giving students the cognitive tools such as statistical analysis tools they need to research and inquire about the lesson topic. A breakdown of what a successful driving question includes will be explained and examples given. The book will include strategies for starting the lesson process with ending goals in mind by creating driving questions and breaking down state and national standards. This book is strongly rooted in research in the learning sciences about project based instruction but will also be designed to be practically useful to teachers and teacher educators and researchers by bridging research and practice.
