This lesson is one approach to teaching the State Standards associated with this unit. Districts are encouraged to customize this lesson by supplementing with district-approved resources, materials, and activities to best meet the needs of learners. The duration for this lesson is only a recommendation, and districts may modify the time frame to meet students' needs. To better understand how your district may be implementing CSOPE lessons, please contact your school teacher. (For past conversations, please visit the [TEA Commissioner's List of State Board of Education Approved Instructional Resources](#) and [Missouri State Adopted Instructional Resources](#).)

Lesson Synopsis

Students will experience evidence that living organisms have basic needs such as food, water, and shelter for animals and air, water, nutrients, sunlight, and space for plants. They will make observations about the consequences on a plant when basic needs are not met. They will write to an expert to get information about the consequences for an animal if basic needs are not met.
