Carroll, Elyn Rykken, 2018-12-20 Geometry The Line and the Circle is an undergraduate text with a strong

narrative that is written at the appropriate level of rigor for an upper level survey or axiomatic course in geometry Starting with Euclid s Elements the book connects topics in Euclidean and non Euclidean geometry in an intentional and meaningful way with historical context The line and the circle are the principal characters driving the narrative In every geometry considered which include spherical hyperbolic and taxicab as well as finite affine and projective geometries these two objects are analyzed and highlighted Along the way the reader contemplates fundamental questions such as What is a straight line What does parallel mean What is distance What is area There is a strong focus on axiomatic structures throughout the text While Euclid is a constant inspiration and the Elements is repeatedly revisited with substantial coverage of Books I II III IV and VI non Euclidean geometries are introduced very early to give the reader perspective on questions of axiomatics Rounding out the thorough coverage of axiomatics are concluding chapters on transformations and constructibility The book is compulsively readable with great attention paid to the historical narrative and hundreds of attractive problems

Genetic Interaction and Gene Transfer Carl W. Anderson,1978 **Brookhaven Symposia in Biology** Brookhaven National Laboratory,1948 Includes bibliographies **Methods for Euclidean Geometry** Owen Byer,Felix Lazebnik,Deirdre L. Smeltzer,2010-12-31 Euclidean plane geometry is one of the oldest and most beautiful topics in mathematics Instead of carefully building geometries from axiom sets this book uses a wealth of methods to solve problems in Euclidean geometry Many of these methods arose where

existing techniques proved inadequate In several cases the new ideas used in solving specific problems later developed into independent areas of mathematics This book is primarily a geometry textbook but studying geometry in this way will also develop students appreciation of the subject and of mathematics as a whole For instance despite the fact that the analytic method has been part of mathematics for four centuries it is rarely a tool a student considers using when faced with a geometry problem Methods for Euclidean Geometry explores the application of a broad range of mathematical topics to the solution of Euclidean problems

The Vanishing Hebrew Harlot Irene E. Riegner, 2009 The Vanishing Hebrew Harlot is written with two objectives First to recover the core meaning of the Hebrew stem ZNH as a complex of non Yahwist rituals deities institutions and beliefs prevalent in ancient Israel and Judah With this understanding the author assigns the translation value participate in non Yahwist religious praxis to ZNH The second objective is to understand how this core meaning came to be encrusted with promiscuity prostitution and detestable things and above all with adultery a capital offense as well as with religious contamination and its destructive consequences In the biblical texts the stem ZNH which encompasses a complex of non Yahwist religious practices operates in a powerful adversarial relationship to the Yahwist complex of religious practices Since non Yahwist sacrifices signify the repudiation of Yahweh non Yahwist sacrifices arouse fierce opposition The prophets Hosea and Jeremiah grasp this adversarial relationship and in their advocacy for Yahweh infuse non Yahwist praxis with images of illicit sexual encounters and with the production of religious contamination that will lead to the devastation of Israel and Judah and to the exile of their inhabitants The new structure of ZNH that emerges with Hosea and Jeremiah is one that re visions ZNH activities by incorporating repugnant sexual imagery and devastating theological contamination into the core of non Yahwist praxis However ZNH also has a sexual signification in contexts that are independent of and distinct from cultic contexts The stem ZNH is examined in its Ancient Near Eastern environment but the thrust of this research is the analysis of ZNH in its Hebrew textual environment using concepts from cognitive linguistics network of associations associated commonplaces and blending
