Lesson 3.6: Solving Systems of Linear Equations

Lesson 3.6: Solving Systems of Linear Equations

Mathematics Florida Standard (MAFS)

MAFS.912.A-REI.3.6

Solve systems of linear equations exactly and approximately (e.g., with graphs), focusing on pairs of linear equations in two variables.

Warm-Up

$$y = mx + b$$

Benito is a waiter. He earns a base salary of \$1500 a month, plus 20% of the price of the meals he serves.

1. Write an equation to predict the amount of money Benito will earn if he serves \$350 in meals in one month.

$$y = 0.20x + 1500$$

$$b = 1500 \text{ (fixed)}$$

$$m = 20\% \Rightarrow 0.20$$

(variable rate)

$$y = 0.2(350) + 1500$$

$$y = 70 + 1500$$

$$y = 1570$$

2. Benito earned \$1,650 in one month. What was the total price of the meals that Benito served?

$$y = 0.20x + 1500$$

$$1650 = 0.20x + 1500$$

$$\begin{array}{r} -1500 \\ \hline \end{array}$$

$$\frac{150}{0.20} = \frac{0.20x}{0.20}$$

$$x = 750$$

3. Create a graph to show the possible amount of money Benito could earn each month.

About Mathematics Gerald R. Rising,James R. Matthews,Eileen Schoaff,Judith Matthew,2021 Mathematics is an essential component of the educated mind It has two important roles to play as queen of the sciences providing the logical structure that holds science together and as a handmaiden to those sciences carrying out the computations that apply scientific concepts Unfortunately a gulf exists between science and the humanities and our text About Mathematics seeks to bridge that gap to serve humanities students just as humanities texts are offered to inform science students In doing so

unlike most math texts we avoid the usual focus on detailed techniques to expose instead some of the important concepts and values of mathematics **Ebony** ,1981-10 EBONY is the flagship magazine of Johnson Publishing Founded in 1945 by John H Johnson it still maintains the highest global circulation of any African American focused magazine Quadratics Richard A. Mollin,2018-04-27 The first thing you will find out about this book is that it is fun to read It is meant for the browser as well as for the student and for the specialist wanting to know about the area The footnotes give an historical background to the text in addition to providing deeper applications of the concept that is being cited This allows the browser to look more deeply into the history or to pursue a given sideline Those who are only marginally interested in the area will be able to read the text pick up information easily and be entertained at the same time by the historical and philosophical digressions It is rich in structure and motivation in its concentration upon quadratic orders This is not a book that is primarily about tables although there are 80 pages of appendices that contain extensive tabular material class numbers of real and complex quadratic fields up to 104 class group structures fundamental units of real quadratic fields and more This book is primarily a reference book and graduate student text with more than 200 exercises and a great deal of hints The motivation for the text is best given by a quote from the Preface of Quadratics There can be no stronger motivation in mathematical inquiry than the search for truth and beauty It is this author s long standing conviction that number theory has the best of both of these worlds In particular algebraic and computational number theory have reached a stage where the current state of affairs richly deserves a proper elucidation It is this author s goal to attempt to shine the best possible light on the subject El-Hi Textbooks in Print ,1984
