Collins, 2009-11-15 Americans have been shocked by media reports of the dismal working conditions in factories that make clothing for U S companies But while well intentioned many of these reports about child labor and sweatshop practices rely on stereotypes of how Third World factories operate ignoring the complex economic dynamics driving the global apparel industry To dispel these misunderstandings Jane L Collins visited two very different apparel firms and their factories in the United States and Mexico Moving from corporate headquarters to factory floors her study traces the diverse ties that link First and Third World workers and managers producers and consumers Collins examines how the transnational economics of the apparel industry allow firms to relocate or subcontract their work anywhere in the world making it much harder for garment workers in the United States or any other country to demand fair pay and humane working conditions Putting a human face on globalization *Threads* shows not only how international trade affects local communities but also how workers can organize in this new environment to more effectively demand better treatment from their distant corporate employers Do Good David B. Creative Globalization Stéphane Callens, 2018-09-05 The purpose of this book is to draw up a picture of the transformations in the innovation systems induced by globalization or globalization We understand the latter as the existence of new macroeconomic solidarities These are attested since about the middle of the 1980s with the observation of a tripolar world drawn up by Kenichi Ohmae The book intends to explain all theories of globalization as well as to clarify its relations with innovation It constitutes an unprecedented synthesis on this theme illustrated by examples from many sectors of activity

Workers of the World, Enjoy! Kenneth H. Tucker, 2012-06-15 The aesthetic politics of social movements turn public life into a public stage where mutual displays of performance often trump rational debate and urban streets become sites of

festivals and carnival In his penetrating new book *Workers of the World Enjoy* Kenneth Tucker provides a new model for understanding social change in our image saturated and aesthetically charged world As emotional and artistic images inform our perceptions and evaluation of politics art and performance often provide new and creative ways of understanding self and society Spanning the nineteenth twentieth and twenty first centuries *Workers of the World Enjoy* uses examples from major social movements that have dramatically changed the dominant capitalist society often in the name of labor Tucker investigates how class and culture develop as he raises questions about what it means for public life and social movements when politics and drama come together Tucker catalogues how aesthetic politics influences social movements from French Revolutionary syndicalism and fascism to the selling of the President and the street theater of the contemporary global justice movement He also discusses the work of political theorists including Jurgen Habermas Jeffrey Alexander and Nancy Fraser to critique the ways public sphere has been studied

Visual Communication Jonathan Baldwin, Lucienne Roberts, 2006-07-12 An award winning title that introduces design students to cultural theory through a series of essays and contributions from leading designers Seeks to locate graphic design in a wider cultural context drawing a student's attention to the key debates and issues that surround it

All Politics Is Global Daniel W. Drezner, 2008-08-18 Has globalization diluted the power of national governments to regulate their own economies Are international governmental and nongovernmental organizations weakening the hold of nation states on global regulatory agendas Many observers think so But in *All Politics Is Global* Daniel Drezner argues that this view is wrong Despite globalization states especially the great powers still dominate international regulatory regimes and the regulatory goals of states are driven by their domestic interests As Drezner shows state size still matters The great powers the United States and the European Union remain the key players in writing global regulations and their power is due to the size of their internal economic markets If they agree there will be effective global governance If they don't agree governance will be fragmented or ineffective And paradoxically the most powerful sources of great power preferences are the least globalized elements of their economies Testing this revisionist model of global regulatory governance on an unusually wide variety of cases including the Internet finance genetically modified organisms and intellectual property rights Drezner shows why there is such disparity in the strength of international regulations
