Developmental Science Marc H. Bornstein, Michael E. Lamb, 2015-07-24 Developmental Science An Advanced Textbook is the most complete and cutting edge introduction to the field available today Since its initial publication the key purpose of the text has been to furnish inclusive developmental perspectives on all substantive areas in psychology neuroscience perception cognition language emotion and social interaction This edition is no exception as it continues to underscore the dynamic and exciting status of contemporary developmental science In this Seventh Edition Marc H Bornstein and Michael E Lamb once again invite international experts to prepare original comprehensive and topical treatments of the major areas of developmental science which are masterfully woven into a single coherent volume Some chapters in this edition are new and those carried forward from the sixth edition have been extensively revised This volume represents faithfully the current status of scholarly efforts in all aspects of developmental science Ideal for advanced undergraduate and introductory graduate courses the text is accompanied by a website with supplementary material for students and instructors including chapter outlines topics to think about before reading glossaries and suggested readings

Measurement, Design, and Analysis Elazar J. Pedhazur, Liora Pedhazur Schmelkin, 2013-04-15 In textbooks and courses in statistics substantive and measurement issues are rarely if at all considered Similarly textbooks and courses in measurement virtually ignore design and analytic questions and research design textbooks and courses pay little attention to analytic and measurement issues This fragmentary approach fosters a lack of appreciation of the interrelations and interdependencies among the various aspects of the research endeavor Pedhazur and Schmelkin's goal is to help readers become proficient in these aspects of research and their interrelationships and to use that information in a more integrated manner The authors offer extensive commentaries on inputs and outputs of computer programs in the context of the topics presented Both the organization of the book and the style of presentation allow for much flexibility in choice sequence and degree of sophistication with which topics are dealt

Island Bats Theodore H. Fleming, Paul A. Racey, 2010-03-15 The second largest order of mammals Chiroptera comprises more than one thousand species of bats Because of their mobility bats are often the only native mammals on isolated oceanic islands where more than half of all bat species live These island bats represent an evolutionarily distinctive and ecologically significant part of the earth's biological diversity Island Bats is the first book to focus solely on the evolution ecology and conservation of bats living in the world's island ecosystems Among other topics the contributors to this volume examine how the earth's history has affected the evolution of island bats investigate how bat populations are affected by volcanic eruptions and hurricanes and explore the threat of extinction from human disturbance Geographically diverse the volume includes studies of the islands of the Caribbean the Western Indian Ocean Micronesia Indonesia the Philippines and New Zealand With its wealth of information from long term studies Island Bats provides timely and valuable information about how this fauna has evolved and how it can be conserved
