Application of HACCP for Distribution System Protection Kathy Martel,2006

OBJECTIVES The purpose of this project was to evaluate the application of the Hazard Analysis Critical Control Point HACCP system a risk management tool to better protect water quality in distribution systems

BACKGROUND HACCP was first conceived in 1959 by the Pillsbury Company to improve food safety for NASA s manned space missions Since the 1980s HACCP has been widely adopted by the food and beverage industry worldwide where it forms an important part of their food safety plans Since the mid 1990s HACCP has been applied by a number of individual drinking water systems and has been incorporated into many drinking water regulatory requirements and guidelines around the globe

HIGHLIGHTS Project pilot studies illustrated that HACCP can be applied to water distribution systems but time and resource requirements were greater than anticipated Project case studies showed that most utilities that achieved HACCP certification had first implemented ISO 9001 and ISO 14001 or similar systems to gain management control of people and processes The case study utilities operated one integrated management system including the ISO systems as well as HACCP to avoid duplication of tasks reduce staff time and costs and improve process integration All case study utilities believed that overall the benefits of the HACCP system outweighed the costs

Handbook of Meat Processing Fidel Toldrá,2010-04-20

This handbook comprehensively presents the current status of the manufacturing of the most important meat products. Editor and renowned meat expert Fidel Toldr heads an international collection of meat scientists who have contributed to this essential reference book. Coverage is divided into three parts. Part one Technologies begins with discussions on meat chemistry, biochemistry and quality and then provides background information on main technologies involved in the processing of meat such as freezing, cooking, smoking, fermentation, emulsification, drying and curing. Also included are key chapters on packaging, spoilage prevention and plant cleaning and sanitation. Part two Products is focused on the description of the manufacture of the most important products including cooked and dry cured hams, cooked and fermented sausages, bacon, canned meat, pat, restructured meats and functional meat products. Each chapter addresses raw materials, ingredients and additives, processing technology, main types of products, production data, particular characteristics and sensory aspects and future trends. Part three Controls offers current approaches for the control of the quality and safety of manufactured meat products with coverage including sensory evaluation, chemical and biological hazards including GMOs, HACCP and quality assurance. This book is an invaluable resource for all meat scientists, meat processors, R D professionals and product developers. Key features: Unparalleled international expertise of editor and contributing authors. Addresses the state of the art of manufacturing the most important meat products. Special focus on approaches to control the safety and quality of processed meats. Extensive coverage of production technologies, sanitation, packaging and sensory evaluation.

Food Safety and International Competitiveness John Spriggs, Grant Isaac, 2001. Food safety is currently one of the most important issues confronting consumers, producers and distributors. It cannot be dealt with as just a physical problem but must be considered as a multi-dimensional one affected by politics, economics and social influences. This book focuses on the specific example of food safety in the beef industry in the USA, Canada, the UK and Australia. It outlines the experience of a number of countries with food safety problems such as BSE and examines drivers for change and institutional arrangements within the four countries, whether there is a socially optimal approach to food safety, how much consumers can rely on the industry to police itself and governments to look after their interests. It also examines the implications for competitiveness and world trade.

HACCP, a Systematic Approach to Food Safety Kenneth E. Stevenson, Dane T. Bernard, 1999. **HACCP** Peter Wareing, 2010-05-06. Hazard Analysis and Critical Control Point (HACCP) is a systematic method to identify, evaluate and control food safety hazards. Since its initial development in the 1960s, HACCP has been increasingly used at every stage of the food chain. In many countries it is a legal requirement for all food business operators to have some form of hazard analysis based on this system and so there has been a growing interest in all aspects of HACCP. Leatherhead Food Research has for many years now offered a comprehensive food safety training programme. These training courses are now going to be complemented with the first in a series of food safety publications. This guide is designed as an easy to use reference book to help all staff implement a thorough HACCP plan into their industry. A good understanding of HACCP is essential right across

the board from team leaders production and engineering staff and supervisors to those working the line including CCP monitors The book contains detailed descriptions of all the basic information required to undertake a HACCP study In addition to this the book has been designed to allow photocopying of certain figures tables and workflow diagrams This publication has been designed as a practical user friendly guide to HACCP and is intended to be used as a reference back in the factory It can be used as an introduction to the basics for those who have never received HACCP training or as a checklist for those who are already using HACCP on a daily basis
