The Years That Matter Most Paul Tough, 2019-09-12 What has gone wrong in our universities And how do we make it right When Amy applied to university she thought she d be judged purely on her merits But she never thought that her family background would have as much impact on her future as her grades When KiKi arrived at university she knew she could be the only black woman in her class But she didn t know how out of place she would feel nor how unwelcoming her peers would be When Orry graduated from university he was told he d probably land a six figure salary But he wasn t told he d end up barely scraping a living wage struggling to feed his children Drawing on the stories of hundreds of American students The Years That Matters Most is a revelatory account of a university system in crisis Paul Tough bestselling author of How Children Succeed exposes a world where small town colleges go bust while the most prestigious raise billions every year where overstretched admissions officers are forced to pick rich candidates over smart ones where black and working class students are left to sink or swim on uncaring campuses Along the way he uncovers cutting edge research from the academics leading the way to a new kind of university one where students succeed not because of their background but because of the quality of their minds The result is a call to arms for universities that work for everyone and a manual for how we can make it happen

Alternative Models of Addiction Hanna Pickard, Serge H. Ahmed, Bennett Foddy, 2015-12-07 For much of the 20th century

theories of addictive behaviour and motivation were polarized between two models. The first model viewed addiction as a moral failure for which addicts are rightly held responsible and judged accordingly. The second model, in contrast, viewed addiction as a specific brain disease caused by neurobiological adaptations occurring in response to chronic drug or alcohol use, over which addicts have no choice or control. As our capacity to observe neurobiological phenomena improved, the second model became scientific orthodoxy, increasingly dominating addiction research and informing public understandings of addiction. More recently, however, a dissenting view has emerged within addiction research, based partly on new scientific research and partly on progress in philosophical and psychological understandings of relevant mental phenomena. This view does not revert to treating addiction as a moral failure but nonetheless holds that addictive behaviour is fundamentally motivated by choice and subject to at least a degree of voluntary control. On this alternative model of addiction, addictive behaviour is an instrumental means to ends that are desired by the individual, although much controversy exists with respect to the rationality or irrationality of these ends, the degree and nature of the voluntary control of addictive behaviour, and motivation, the explanation of the difference between addictive and non-addictive behaviour, and motivation, and lastly, the extent to which addictive behaviour and motivation is correctly characterised as pathological or diseased. This research topic includes papers in the traditions of neuroscience, psychology, philosophy, law, and social science that explore alternative understandings of addiction.

The Meritocracy Trap Daniel Markovits, 2019-09-10. This book flips your world upside down. Daniel Markovits argues that meritocracy isn't a virtuous, efficient system that rewards the best and brightest. Instead, it rewards middle-class families who can afford huge investments in their children's education. Frightening, eye-opening stuff. The Times Books of the Year. Even in the midst of runaway economic inequality and dangerous social division, it remains an axiom of modern life that meritocracy reigns supreme and promises to open opportunity to all. The idea that reward should follow ability and effort is so entrenched in our psyche that even as society divides itself at almost every turn, all sides can be heard repeating meritocratic notions. Meritocracy cuts to the heart of who we think we are. But what if both up and down the social ladder, meritocracy is a sham? Today, meritocracy has become exactly what it was conceived to resist: a mechanism for the concentration and dynastic transmission of wealth and privilege across generations. Upward mobility has become a fantasy, and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite. At the same time, meritocracy now ensnares even those who manage to claw their way to the top, requiring rich adults to work with crushing intensity, exploiting their expensive educations in order to extract a return. All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes. This is the radical argument that *The Meritocracy Trap* prosecutes with rare force: comprehensive research and devastating persuasion. Daniel Markovits, a law professor trained in philosophy and economics, is better placed than most to puncture one of the dominant ideas of our age. Having spent his life at elite universities, he knows from the inside the corrosive system we are trapped within, as well as
