The Jewish Educational Leader's Handbook Robert E. Tornberg,1998 Classroom teaching it addresses supplementary school settings and features a Noticeably larger section devoted to the growing day school sector Save Them All Wendy Green,2019-09-23 Save Them All contains true and shocking stories of underprivileged and troubled kids living in the beautiful Bay Area of Northern California The book is written with empathy irony and a touch of comedy and also gives deep insight into the lives of everyday kids on political issues the struggles facing our public school teachers and the societal issues that bring on many of these problems Many of the stories contain disturbing accounts of the issues facing the everyday life of the at risk students and the struggles of a rookie teacher contending with the conflict between her desire to contribute

and the realities of society's failures. Topics are suicide, gangs, drug abuse, murder, and child abuse and neglect. The book is not a condemnation of our public schools but is meant to be an insight into the realities politicians and society refuse to address. It is a must read if you care about kids, schools, the politics of education, and how to make a difference. *Save Them All* will shock and inspire, educate and entertain, create laughter and tears, and possibly influence the reader to implement change. All names have been changed for privacy and confidentiality.

Children of the Damned John Michael Osborne, 2009-12-29
Paul Jameson, a newly hired high school guidance counselor and his daughter Monica, moved to West Highland, Georgia. The suburb of Atlanta was held in the grip of three teens who called themselves the Evil Trinity. The Evil Trinity seemingly possessed psychic and paranormal powers that allowed them to find out personal things, bad things that people wanted no one to know, including a shameful event three adults covered up. Can Paul discover the secret before it costs him his life and the life of his daughter?

The Arbornaut Meg Lowman, 2021-08-05
One of the world's first tree-top scientists, Meg Lowman is both a pioneer in her field; she invented one of the first treetop walkways and a tireless advocate for the planet. In a voice as infectious in its enthusiasm as in its practical optimism, *The Arbornaut* chronicles her irresistible story. From climbing solo hundreds of feet into Australia's rainforests to measuring tree growth in the northeastern United States, from searching the redwoods of the Pacific coast for new life to studying leaf eaters in Scotland's Highlands, from a bioblitz in Malaysia to conservation planning in India to collaborating with priests in Ethiopia's last forests, Lowman launches us into the life and work of a scientist and ecologist. She also offers hope-specific plans and recommendations for action despite devastation across the world; we can still make an immediate and lasting impact against climate change.

The Rotten Apple Bill Pirkle, 2024-04-02
Mr. Pirkle has a degree in mathematics. He was an emergency substitute teacher for over three years teaching when regular substitutes weren't available. During that time, he taught all grades from kindergarten to twelfth grade. This included teaching advanced placement classes and special education. Appalled by what he saw, especially in grades 7 through 12, he began attending school board meetings and making suggestions on how to improve the schools. He also wrote *The Pirkle Report* for his local paper, trying to explain to the public what was going on. The school board refused to even consider his suggestions, suggestions coming from a man who, unlike the school board members, had actually been there in the classroom. He realized that the school board was afraid to make any changes that might upset the teachers union. This book will show that the teachers union actually controls and runs the schools. So Mr. Pirkle decided to write this book to show the public and particularly the parents what is going on in schools and why we can't solve the education problem. His suggestions are in this book so that the reader can judge for themselves. Mr. Pirkle believes that more money is not the answer; rather, we need to improve the learning environment. Schools have to be more serious and more professional and less social and less fun. His solutions cost no money. He feels that this is the problem since everyone involved wants more money and are not interested in discussing free solutions. This book will open your eyes.
