this book stems from a firm conviction that education is the bedrock of a progressive society and a truly inclusive educational system is not merely an ideal but an urgent necessity for India's equitable development. In these pages I invite you to join me in a critical examination of how inclusive and exclusive practices manifest within the Indian educational context. I have meticulously researched and analyzed the historical trajectory, the policy frameworks that have been painstakingly developed and the formidable challenges that continue to impede the realization of true inclusion. It has been my constant endeavor to root this analysis in verified facts and academic rigor, ensuring that my perspectives are informed by a strong foundation of evidence. I have also striven to present these complex issues with clarity and depth, aiming to provide a comprehensive resource for policymakers, educators, researchers, parents, and anyone invested in the future of Indian education. This book is more than an academic exercise; it is my earnest attempt to contribute to the ongoing dialogue, to challenge existing paradigms, and to propose actionable pathways towards a more just, equitable, and ultimately more compassionate educational system for every child in our diverse nation. My hope is that by dissecting the intricacies of this subject, we can collectively move closer to a reality where every classroom in India truly embraces and celebrates the unique potential of every learner.
