Transport Phenomena in Biological Systems George A. Truskey, Fan Yuan, David F. Katz, 2004 Presenting engineering fundamentals and biological applications in a unified way this book provides learners with the skills necessary to develop and critically analyze models of biological transport and reaction processes Midwest *Scientific and Technical Aerospace Reports*, 1995

Nonequilibrium Thermodynamics Yasar Demirel, 2007-10-10 Natural phenomena consist of simultaneously occurring transport processes and chemical reactions These processes may interact with each other and lead to instabilities fluctuations and evolutionary systems This book explores the unifying role of thermodynamics in natural phenomena

Nonequilibrium Thermodynamics Second Edition analyzes the transport processes of energy mass and momentum transfer processes as well as chemical reactions It considers various processes occurring simultaneously and provides students with more realistic analysis and modeling by accounting possible interactions between them This second edition updates and expands on the first edition by focusing on the balance equations of mass momentum energy and entropy together with the Gibbs equation for coupled processes of physical chemical and biological systems Every chapter contains examples and practical problems to be solved This book will be effective in senior and graduate education in chemical mechanical systems biomedical tissue biological and biological systems engineering as well as physical biophysical biological chemical and biochemical sciences Will help readers in understanding and modelling some of the coupled and complex systems such as coupled transport and chemical reaction cycles in biological systems Presents a unified approach for interacting processes combines analysis of transport and rate processes Introduces the theory of nonequilibrium thermodynamics and its use in simultaneously occurring transport processes and chemical reactions of physical chemical and biological systems A useful text for students taking advanced thermodynamics courses
