Dijkman, Irma Mikkonen, Petrie F. Roodbol, 2018-11-11 This contributed volume is based on the European Core Competences Framework for health and social care professionals working with older people ECCF developed and verified in a unique international cooperation between 26 universities and universities of applied sciences in 25 European countries part of the European Later Life Active Network ELLAN In addition to the framework the book outlines

the necessary qualifications and describes the roles of professionals working with older people in health and social services. It explores healthy ageing for older people from different perspectives and describes the seven roles of health and social care professionals: Expert, Communicator, Collaborator, Organizer, Health and Welfare Advocate, Scholar, and Professional. Before going on to define 18 related competences and elaborating them in performance indicators, Beyond the ECCF the book explains the widely used CanMED role model and puts forward theories to support a client centered and integrated approach on health and social care in order to change attitudes toward older clients and offer better care and support. It also provides health and social care professionals, for example nurses, allied health professionals, and social workers, with new contextual information and cultural awareness. It gives a voice to students by addressing selected perspectives for professional development. The book includes questions for reflective learning, helping to make the book a vital practical instrument for use in the educational context throughout Europe. Europe's ageing populations represent a major challenge for both public health and social care systems. 18% of the population is 65 years old and over, and this proportion will increase in the coming years. As a result, more and more health and social care professionals will work with older people in different settings, at home in the community, in hospitals, or in long term care settings. Older people, and especially the frail, face a host of interrelated issues, e.g. cognitive restrictions, functional restrictions, psychosocial problems, multimorbidity, polypharmacy, and social isolation. These problems call for an integrated approach to health and social care, which this book supplies. It is intended for health and social care professionals, students, and educators for a better understanding of Europe's ageing society and of the impact on care and services. Furthermore, the ECCF offers educational institutes a unique resource for curriculum development, education, training, and assessment.

Positive Psychotherapy Tayyab Rashid, Martin P. Seligman, 2018-07-17

For over a century the focus of psychotherapy has been on what ails us, with the therapeutic process resting upon the assumption that unearthing past traumas, correcting faulty thinking, and restoring dysfunctional relationships is curative. And indeed they are, but in the rush to identify and reduce symptoms of mental disorder, something important has been overlooked: the positives. Should enhancing well-being and building upon character strengths and virtues be explicit goals of therapy? Positive Psychotherapy provides therapists with a session-by-session therapeutic approach based on the principles of positive psychology, a burgeoning area of study examining the conditions and processes that enable individuals, communities, and institutions to flourish. This clinician's manual begins with an overview of the theoretical framework for positive psychotherapy, exploring character strengths and positive psychology practices, processes, and mechanisms of change. The second half of the book contains 15 positive psychotherapy sessions, each complete with core concepts, guidelines, skills, and worksheets for practicing skills learned in session. Each session also includes at least one vignette, as well as discussion of cross-cultural implications. Mental health professionals of all orientations will find in *Positive Psychotherapy* a refreshing alternative to symptom-based approaches.

that will endow clients with a sense of purpose and meaning that many have found lacking in more traditional therapies

Reducing preventable deaths: Health education and policy Georgi Iskrov, Amelia Kekeletso Ranotsi, 2023-07-27

The Routledge Companion to Financial Services Marketing Tina Harrison, Hooman Estelami, 2014-12-05 Interest in Financial Services Marketing has grown hugely over the last few decades particularly since the financial crisis which scarred the industry and its relationship with customers It reflects the importance of the financial services industry to the economies of every nation and the realisation that the consumption and marketing of financial services differs from that of tangible goods and indeed many other intangible services This book is therefore a timely and much needed comprehensive compendium that reflects the development and maturation of the research domain and pulls together in a single volume the current state of thinking and debate The events associated with the financial crisis have highlighted that there is a need for banks and other financial institutions to understand how to rebuild trust and confidence improve relationships and derive value from the marketing process Edited by an international team of experts this book will

provide the latest thinking on how to manage such challenges and will be vital reading for students and lecturers in financial services marketing policy makers and practitioners *Pluralising International Legal Scholarship* Rossana

Deplano, 2019-12-27 This unique book examines the role non doctrinal research methods play in international legal research what do they add to the traditional doctrinal analysis of law and what do they neglect Focusing on empirical and socio legal methods it provides a critical evaluation of the breadth scope and limits of the representation of international law created by these often neglected methodologies
