*Closing the Opportunity Gap* Vijay Pendakur, 2023-07-03 This book offers a novel and proven approach to the retention and success of underrepresented students It advocates a strategic approach through which an institution sets clear goals and metrics and integrates the identity support work of cultural diversity centers with skill building through cohort activities enabling students to successfully navigate college graduate on time and transition to the world of work Underlying the process is an intersectional and identity conscious rather than identity centered framework that addresses the complexity of students assets and needs as they encounter the unfamiliar terrain of college In the current

landscape of higher education colleges and universities normally divide their efforts between departments and programs that explicitly work on developing students identities and separate departments or programs that work on retaining and graduating higher risk students This book contends that the gap between cultural diversity centers and institutional retention efforts is both a missed opportunity and one that perpetuates the opportunity gap between students of color and low income students and their peers Identity consciousness the central framework of this book differs from an identity centric approach where the identity itself is the focus of the intervention For example a Latino men s program can be developed as an identity centered initiative if the outcomes of the program are all tied to a deeper or more complex understanding of one s Latino ness and or masculinity Alternately this same program can be an identity conscious student success program if it is designed from the ground up with the students racial and gender identities in mind but the intended outcomes are tied to student success such as term to term credit completion yearly persistence engagement in high impact practices or timely graduation Following the introductory chapter focused on framing how we understand risk and success in the academy the remaining chapters present programmatic interventions that have been tested and found effective for students of color working class college students and first generation students Each chapter opens with a student story to frame the problem outlines the key research that informs the program and offers sufficient descriptive information for staff or faculty considering implementing a similar identity conscious intervention on their campus The chapters conclude with a discussion of assessment and suggested Action Items as starting points

*Learn to See the Invisible* Michael Bremer, 2024-10-31 Most improvement consultants say improvement efforts must be led by the CEO and that is certainly ideal But the actual reality is most CEOs do not actively drive guide improvement They want it to happen but they focus most of their energy on other issues According to surveys from Gallup and others the number one reason people say I am not engaged is due to the behaviors of their direct boss Those leaders in the middle of an organization have a tremendous amount of leverage first and second line leaders directly touch 80% of the people in their organization They have a tremendous amount of influence and more power than they might realize This book focuses on that demographic This book describes four key foundations and 25 different actions leaders can practice to become more effective in training their eyes to see things tomorrow that are currently invisible It helps leaders and managers to become better observers of their current reality by practicing getting better at getting better The goal is to get better in the way we lead the way our team performs and the results we accomplish If done in the right way visually posting your improvement targets is the key to driving more personal growth as well as more cross functional collaboration and cooperation in your work activities The most unique aspect of this book is that it suggests leaders use visual tools Visual Leadership is the fourth foundational element the author encourages people to practice The primary purpose of visual performance metrics isn't to make sure things are working well in your department It's to create a thinking environment that makes it easier for multiple departments teams and groups to work together It is relatively easy to come up with performance metrics for your team but what about metrics that help us to work more effectively together Good visual reporting practices create information democracy They eliminate

filters that obscure knowledge between layers of management and between departments They help to create an environment that is much more robust and open making it easier to be in touch with the actual reality And perhaps the most exciting of all visual tools can help an individual learn to lead more effectively The power of using visuals in this way is underutilized in most organizations Whatever new behaviors a leader is trying to accomplish visual reporting can facilitate progress and ensure accountability in developing those new habits
