

Refrigeration Log

Instructions: A designated food service employee will record the date, time, air temperature, corrective action, and initials on this log for each holding unit. Holding units include walk-in coolers, refrigerators and milk coolers. The food service manager will verify that food service employees have taken the required temperatures by visually monitoring food service employees during the shift and reviewing, initialing, and dating this log each working day. Maintain this log for a minimum of one year.

emissions from the retail segment of the food cold chain are relatively high compared to other parts of the food cold chain. Studies have also shown that food temperature is less well controlled at the retail and consumer end of the cold chain. There is therefore considerable potential to optimize performance of refrigerated display cabinets and the refrigeration systems that are used to operate them to reduce carbon emissions and to improve food temperature control.

Sustainable Retail Refrigeration draws together world experts on retail refrigeration. In a single resource the authors cover the latest technologies and best current knowledge in the field. With increasing concerns about energy use and global warming, gasses, retailers are increasingly being called to account for their actions. **Sustainable Retail Refrigeration** is a valuable reference to manufacturers, managers and policy makers incorporating both a design and an operational perspective.

Lloyd's Register Technical Association Session 1977-1978 Lloyd's Register Foundation, 1977-01-01. The Lloyd's Register Technical Association (LRTA) was established in 1920 with the primary objective of sharing technical expertise and knowledge within Lloyd's Register. Publications have consistently been released on a yearly basis with a brief interruption between 1938 and 1946. These publications serve as a key reference point for best practices and were initially reserved for internal use to maximise LR's competitive advantage. Today the LRTA takes a fresh approach focusing on collaboration by combining professional expertise from across LRF Group to ensure a frequent output of fresh perspectives and relevant content. The LRTA has evolved into a Group wide initiative that identifies, captures and shares knowledge spanning various business streams and functions. To support this modern approach the LRTA has adopted a new structure featuring representatives and senior governance across the business streams and the LR Foundation. The Lloyd's Register Technical Association Papers should be seen as historical documents representing earlier viewpoints and are not reflective of current thinking and perspectives by the current LR Technical Association. The Lloyd's Register Staff Association (LRSA) changed its name to the Lloyd's Register Technical Association (LRTA) in 1973.
