Discipline Problems Tadashi Dozono, 2024-05-07 Angel a Black tenth grader at a New York City public school self identifies as a nerd and likes to learn But she's troubled that her history classes leave out events like the genocide and dispossession of Indigenous people in the Americas presenting a sugar coated image of the United States that is at odds with her everyday experience The history I learned in school is simpler she says The world I live in is a lot more complex Angel like every student interviewed in Discipline Problems has been identified by teachers as a troublemaker a student whose behavior disrupts classroom norms and interferes with instruction But her critiques of the curriculum she's taught speak to her curiosity and insight crucial foundations for understanding history Like many students who have been marginalized by systemic racism in American schools she exposes the shortcomings of her classrooms academic environments by challenging both the content and the methods of her education All too often these challenges are framed as troublemaking and the students are disciplined for acting out instead of being rewarded for their intellectual engagement Tadashi Dozono a professor of education and former high school social studies teacher takes seriously the often overlooked critiques that students of color who get labeled as troublemakers direct toward their high school history curriculum He reinterprets troublemaking usually cast as a behavioral deficit as an intellectual asset and form of reasoning that challenges the disciplining reason of classrooms where whiteness is valued over the histories and knowledge of people of color Dozono shows how what are traditionally framed as discipline problems can be seen through a different lens as responses to educational practices that marginalize non white students Discipline Problems reveals how students of color seek out alternate avenues for understanding their world and imagines a pedagogy that champions the curiosity intellect and knowledge of marginalized learners

Against Elections David Van Reybrouck, 2018-04-17 A small book with great weight and urgency to it this is both a history of democracy and a clarion call for change Without drastic adjustment this system cannot

last much longer writes Van Reybrouck regarded today as one of Europe's most astute thinkers If you look at the decline in voter turnout and party membership and at the way politicians are held in contempt if you look at how difficult it is to form governments how little they can do and how harshly they are punished for it if you look at how quickly populism technocracy and anti parliamentarianism are rising if you look at how more and more citizens are longing for participation and how quickly that desire can tip over into frustration then you realize we are up to our necks Not so very long ago the great battles of democracy were fought for the right to vote Now Van Reybrouck writes it's all about the right to speak but in essence it's the same battle the battle for political emancipation and for democratic participation We must decolonize democracy We must democratize democracy As history Van Reybrouck makes the compelling argument that modern democracy was designed as much to preserve the rights of the powerful and keep the masses in line as to give the populace a voice As change agent Against Elections makes the argument that there are forms of government what he terms sortitive or deliberative democracy that are beginning to be practiced around the world and can be the remedy we seek In Iceland for example deliberative democracy was used to write the new constitution A group of people were chosen by lot educated in the subject at hand and then were able to decide what was best arguably far better than politicians would have A fascinating and workable idea has led to a timely book to remind us that our system of government is a flexible instrument one that the people have the power to change Mass Communication Ralph E.
