Makeda,2024-06-28 Over the course of their history the Navajo Din have constructed many types of architecture but during
the 20th century one building emerged to become a powerful and inspiring symbol of tribal culture This book describes the
rise of the octagonal stacked log hogan as the most important architectural form among the Din The Navajo Nation is the
largest Indian reservation in the United States and encompasses territory from within Arizona New Mexico and Utah where
thousands of Native American homes called hogans dot the landscape Almost all of these buildings are octagonal Whether
built from plywood nailed onto a wood frame or with other kinds of timber construction octagonal hogans derive from the
stacked log hogan a form which came to prominence around the middle of the last century The stacked log hogan has also
influenced public architecture and virtually every Din community on the reservation has a school senior center office building
or community center that intentionally evokes it Although the octagon recurs as a theme across the Navajo reservation the
inventiveness of vernacular builders and professional architects alike has produced a wide range of octagonally inspired
architecture Previous publications about Navajo material culture have emphasized weaving and metalwork overlooking the
importance of the tribe s built environment But populated by an array of octagonal public buildings and by the hogan one of
the few Indigenous dwellings still in use during the 21st century the Navajo Nation maintains a deep connection with
tradition This book describes how the hogan has remained at the center of Din society and become the basis for the most
distinctive Native American landscape in the United States The Din Hogan A Modern History will appeal to scholarly and
educated readers interested in Native American history and American architecture It is also well suited to a broad selection
of college courses in American studies cultural geography Native American art and Native American architecture *Start*
