Introduction

FireFinder XLS is a microprocessor based advanced life safety system. 17" display and large lighted buttons makes it the most intuitive fire alarm user interface in the industry. Its use of the unique multi-processor "gpf" design along with its ability to utilize both analog and conventional detection devices make it an extremely flexible and configurable life safety system.

The XLS is ideally suited for commercial, institutional and industrial fire detection and notification applications. It complies with the requirements of NFPA Standard 72 and is listed by Underwriters Laboratories under their standard UL864. Underwriter's Laboratories of Canada also lists it for fire applications under ULC-S523. It is approved by

Factory Mutual as well as CSPM and MIRA for use in these specific locales.

In addition to the standard fire applications, XLS is listed by Underwriters Laboratories under the category UL864 for smoke control. XLS can be used as a listed FirePanel's Smoke Control System in high rise office buildings, malls and other large structures.

XLS is listed for UL and approved by FM for detecting flammable (LFL), Gasoline vapor, acetone vapors and propane or detector controlled systems. These include both in water applications. XLS follows the following requirements specified in the NFPA 72 Standards 72A, 72B and 720B.
