Land-use/Transport Planning in Hong Kong Harry T. Dimitriou, Alison H.S Cook, 2019-07-09 First published in 1998 this volume is certain to be the definitive work about the practice of land use and transport planning in Hong Kong Dimitriou and Cook explore the historical developments current issues and problems policy and planning responses and new directions Hong Kong has experienced remarkable economic growth as the Gateway to China and its land use has become a model for other cities in the region and for China as a whole **Service-Learning for Youth Leadership** Daniel T. L. Shek, Grace Ngai, Stephen C. F. Chan, 2018-08-13 This book examines service learning a valuable means of promoting civic engagement and youth leadership in students by enabling them to apply their knowledge to needy people in the community It describes selected service learning projects in different areas by highlighting the subjects being offered service sites completed service projects evaluation findings and teachers reflections Although service learning has increased tremendously in the West its development in different Chinese societies is still in its infancy As such this book provides valuable insights on the implementation and future directions of the service learning movement in China by documenting lessons learned and sharing success stories It also discusses related evaluation findings and impacts on students to show that service learning can increase students empathy social awareness social responsibility and psychosocial skills and as a result can improve their quality of life In addition the book highlights how service learning activities promote the well being of the clients and communities being served It also stimulates thinking and sharpens the thoughts of educators administrators and those who wish to promote the quality of life of students and service recipients through service learning **Structural Health Monitoring of Long-Span Suspension Bridges** You Lin Xu, Yong Xia, 2011-08-31 Long span suspension bridges cost billions In recent decades structural health monitoring systems have been developed to measure the loading environment and responses of these bridges in order to assess serviceability and safety while tracking the symptoms of operational incidents and potential damage This helps ensure the bridge functions properly during a long service life and guards against catastrophic failure under extreme events Although these systems have achieved some success this cutting edge technology

involves many complex topics that present challenges to students researchers and engineers alike Systematically introducing the fundamentals and outlining the advanced technologies for achieving effective long term monitoring Structural Health Monitoring of Long Span Suspension Bridges covers The design of structural health monitoring systems Finite element modelling and system identification Highway loading monitoring and effects Railway loading monitoring and effects Temperature monitoring and thermal behaviour Wind monitoring and effects Seismic monitoring and effects SHMS based rating method for long span bridge inspection and maintenance Structural damage detection and test bed establishment These are applied in a rigorous case study using more than ten years worth of data to the Tsing Ma suspension bridge in Hong Kong to examine their effectiveness in the operational performance of a real bridge The Tsing Ma bridge is the world's longest suspension bridge to carry both a highway and railway and is located in one of the world's most active typhoon regions Bridging the gap between theory and practice this is an ideal reference book for students researchers and engineering practitioners **Transport Planning & Design Manual** Hong Kong.
