A More Charitable Atheism James A. Metzger, 2019-10-04 This anthology consists of fourteen topically arranged essays that explore a form of humanism characterized by epistemic humility a progressive ethical orientation as well as a respect for the positive features of religion According to recent polls more Americans find themselves uncomfortable maintaining traditional religious beliefs and moral commitments a trend driven in large part by the Millennials and one likely to continue with subsequent generations As a professor who has regular interactions with students of this generation the author has discovered that those who neither wish to affiliate with one particular religious tradition or community as perhaps their parents and grandparents did nor drop religion altogether fear that there are few if any truly attractive alternatives alternatives that would help them find meaning offer sound moral guidance and navigate life s most challenging times This book in part aims to show that both meaning and resources for crafting a philosophically sound moral compass can be found outside the sacred canopy These essays however are also the outcome of the author s own journey from mainline Protestant Christianity to secular humanism The primary catalyst for this transition was the onset of a serious autoimmune illness which forced him to confront various issues in philosophy of religion particularly the problem of suffering and evil This autobiographical component is woven into several chapters with the intention of showing that in a postmodern milieu we can no longer attribute major worldview shifts to solitary dispassionate rational inquiry Although essays have been composed in such a way that each may stand alone a feature of the book that allows readers to approach chapters in any order they choose they nevertheless have been arranged into four sections that reflect the author s personal journey Major topics include 1 Chronic Illness and the Death of God 2

Epistemic Limitations and Respect for Persons 3 A Humanist Approach to Reading the Bible and 4 Advantages of Ethical Reasoning without God *Encyclopedia of Philosophy* Donald M. Borchert, 2006 This volume covering entries from Masaryk Tomas Garrigue to Nussbaum Martha presents articles on Eastern and Western philosophies medical and scientific ethics the Holocaust terrorism censorship biographical entries and much more *Directory of American Scholars: Philosophy, religion and law* , 1999 **Contemporary Practice and Method in the Philosophy of Religion** David Cheetham, Rolfe King, 2008-05-27 An important collection of essays from a range of philosophers from different backgrounds focusing on the growing importance of the philosophy of religion in providing a multi perspective approach to the subject area *Science and Narratives of Nature* Jobin M. Kanjirakkat, Gordon McOuat, Sundar Sarukkai, 2017-07-05 The discourse and practice of science are deeply connected to explicit and implicit narratives of nature However nature has been understood in diverse ways by cultures across the world Could these different views of nature generate the possibility of alternate views on science Part of the innovative series Science and Technology Studies this volume looks at different conceptualizations of nature and the manner in which they structure the practice of the sciences The essays draw upon philosophy history sociology religion feminism mathematics and cultural studies and establish a dialogue between cultures through a multi disciplinary exploration of science With contributions from major scholars in the field this volume will deeply interest scholars and students of science and technology studies sociology history and philosophy of science as also environmental studies **The Cumulative Book Index** , 1998 A world list of books in the English language **The Internet University** Daniel Quinn Mills, 1998 Welcome to college via the Internet Because of the tremendous growth of education on the Internet students can now experience the college dream through cyberspace and put together all or part of their college education in many fields with few or even no visits to any campus The academic resources of the world are delivered to their front door through modem or network [The British National Bibliography](#) Arthur James Wells, 2004 **Jacob Brucker, Critical History of Philosophy: 'Preliminary Discourse' and 'On The Socratic School'** , 2024-10-19 It is well known that philosophy has a history that spans over more than two thousand years It is less known however that the discipline narrating philosophy's past emerged much later namely in the 18th century That new discipline was called history of philosophy The German historian and theologian Johann Jacob Brucker 1696 1770 had a decisive influence upon the formation of this new discipline through his Latin work *Historia critica philosophiae* Critical history of philosophy which was first published in 1742 1744 and which came out in a second edition in 1766 1767 To Brucker it was paramount to define history of philosophy as a philosophical discipline and not merely as a historical discipline In order to achieve this it was vital to define the new discipline's object and explain which material should be included or excluded and it was crucial to define an interpretative and philosophical method to be deployed on the material selected Brucker's *Historia* provided these definitions in the opening chapter in the present volume translated as the Preliminary Discourse where he also outlined a global scheme of periodization and

geographical regions Moreover he put his own precepts to practice in the remaining part of the work which accounted for what he regarded as a global history of philosophy from the beginning of the world up till his own times The second chapter translated in the present book The Socratic School illustrates the hermeneutical consequences of the method laid down in the Preliminary Discourse but it also offers a unique insight into the 18th century understanding and evaluation of Socrates In quantitative terms Brucker s *Historia* was the most extensive account of philosophy s past produced in the 18th century It was cited and paraphrased in the most authoritative encyclopaedias and histories of philosophy produced in Europe in the 18th and 19th centuries and its key concepts were often transferred to histories of philosophy produced outside Europe For this reason Brucker s *Historia* has exerted an enormous influence upon historical consciousness among Europeans but also among peoples living outside Europe The present book provides first time English translations of parts of Brucker s work

Timmermans,Adele E. Clarke,Ellen Balka,2016-02-26 The multifaceted work of the late Susan Leigh Star is explored through a selection of her writings and essays by friends and colleagues Susan Leigh Star 1954 2010 was one of the most influential science studies scholars of the last several decades In her work Star highlighted the messy practices of discovering science asking hard questions about the marginalizing as well as the liberating powers of science and technology In the landmark work *Sorting Things Out* Star and Geoffrey Bowker revealed the social and ethical histories that are deeply embedded in classification systems Star s most celebrated concept was the notion of boundary objects representational forms things or theories that can be shared between different communities with each holding its own understanding of the representation Unfortunately Leigh was unable to complete a work on the poetics of infrastructure that further developed the full range of her work This volume collects articles by Star that set out some of her thinking on boundary objects marginality and infrastructure together with essays by friends and colleagues from a range of disciplines from philosophy of science to organization science that testify to the wide ranging influence of Star s work Contributors Ellen Balka Eevi E Beck Dick Boland Geoffrey C Bowker Janet Ceja Alcal Adele E Clarke Les Gasser James R Griesemer Gail Hornstein John Leslie King Cheris Kramarae Maria Puig de la Bellacasa Karen Ruhleder Kjeld Schmidt Brian Cantwell Smith Susan Leigh Star Anselm L Strauss Jane Summerton Stefan Timmermans Helen Verran Nina Wakeford Jutta Weber *The End of Comparative Philosophy and the Task of Comparative Thinking* Steven Burik,2010-07-02 How do differences in language influence comparative philosophy Although the Orientalism famously described by Edward Said is rare today Steven Burik maintains that comparative philosophy often subtly privileges one tradition over another since certain conceptual schemes are so embedded in Western languages that it is difficult not to revert to them Arguing for a new approach that acknowledges how theory and practice cannot be separated in comparative philosophical endeavors Burik provides nonmetaphysical deconstructionist readings of Heidegger and Derrida and uses these to give a new reading of classical Daoism The ideas of

language advanced therein can aid the project of comparative philosophy specifically and philosophies generally in trying to overcome ways of thinking that have dominated Western philosophy for twenty five hundred years and still frustrate intercultural encounters

Mormonism in Dialogue with Contemporary Christian Theologies David Lamont Paulsen, Donald W. Musser, 2007 This volume brings together for the first time a broad range of scholars from Mormon and other Christian traditions Replacing polemics and apologetics with dialogue these exchanges show how the full spectrum of contemporary theologies can be informed by uniquely Mormon ideas and correlatively how Mormon thought can be illuminated through the study of key ideas of the foremost theologians of the twentieth and twenty first centuries
