THEORETICAL TOOLS OF PUBLIC FINANCE

Questions and Problems

1. Assume that the price of a bus trip is \$1, and the price of a gallon of gas is \$2.50. What is the relative price of a gallon of gas, in terms of bus trips? What happens when the price of a bus trip rises to \$1.25?

A commuter could exchange 2.5 bus trips for 1 gallon of gas (both will cost \$2.50), so the relative price of a gallon of gas is 2.5 bus trips. At \$1.25 per bus trip, the relative price of a gallon of gas has dropped to $\$2.50 \div \$1.25 = 2$ bus trips.

2. Draw the demand curve $Q = 250 - 10P$. Calculate the price elasticity of demand at prices of \$5, \$10, and \$15 to show how it changes as you move along this linear demand curve.

One way to sketch a linear demand function is to find the x (Q) and y (P) intercepts. $Q = 0$ when $P = \$25$. When $P = 0$, $Q = 250$.

Solving for $P = \$5$, $Q = 250 - 10(5) = 250 - 50 = 200$.
Similarly, solving for $P = \$10$, $Q = 250 - 10(10) = 150$.
And solving for $P = \$15$, $Q = 250 - 150 = 100$.

Price elasticity is the percent change in the quantity purchased divided by the percent change in price. To calculate these percentage changes, divide the change in each variable by its original value. Moving in \$5 increments:

As P increases from \$5 to \$10, Q falls from 200 to 150.
Therefore, P increases by 100% ($5/5$) as Q falls by 25% ($50/200$).
Elasticity = $-0.25/1.00 = -0.25$.

Office of Operational Policy and Procedures,1981 **Public Investment Management Reference Guide** Jay-Hyung Kim,Jonas Arp Fallov,Simon Groom,2020-03-03 The Public Investment Management PIM Reference Guide aims to convey country experiences and good international practices as a basis for decisions on how to address a country specific PIM reform agenda The country references are drawn largely from previous diagnostics and technical assistance reports of the World Bank The application of country diagnostics and assessments has revealed a need to address the following issues when undertaking a country reform in PIM Clarification of the definition and scope of public investment and public investment management Establishment of a sound legal regulatory and institutional setting for PIM making sure it is linked to the budget process Allocation of roles and responsibilities for key players in PIM across government Strengthening of guidance on project preappraisal appraisal and selection prioritization procedures and deepening of project appraisal methodologies Integration of strategic planning project appraisal selection and capital budgeting Management of multiyear capital budget allocations and commitments Efforts to address effective implementation procurement and monitoring of projects Strengthening of asset management and ex post evaluation Integration of PIM and public private partnership PPP in a unified framework Rationalization and prioritization of the existing PIM project portfolio Development of a PIM database and information technology in the form of a PIM information system The PIM Reference Guide does not seek to provide definitive answers or standard guidance for the common PIM issues facing countries Nor does it seek to provide a detailed

template for replication across countries this would be impossible given the diversity of country situations Instead each chapter begins with an overview of the specific reform issue lists approaches and experiences from different countries and summarizes the references and good practices to be considered in designing country specific reform actions Public Finance, Global Edition Ted Gayer, HARVEY ROSEN, 2014-01-16 Rosen and Gayer's Public Finance provides the economic tools necessary to analyze government expenditure and tax policies and along the way takes students to the frontiers of current research and policy While the information presented is cutting edge and reflects the work of economists currently active in the field the approach makes the text accessible to undergraduates whose only prior exposure to economics is at the introductory level The authors years of policy experience have convinced them that modern public finance provides a practical and invaluable framework for thinking about policy issues The goal is simple to emphasize the links between sound economics and the analysis of real world policy problems Enhancements and key features for this new Global Edition include New Policy Perspectives introduce relevant and engaging examples of international policy so students can extend their understanding of theory to policymaking across the globe New Empirical Evidence applications provide students with real world examples that are relevant to them from case studies about Sweden and China to global examples that compare experiences between countries Updated end of chapter questions broaden critical thinking encouraging students to apply their knowledge to international and comparative examples The results of econometric models are used to help students understand how expenditure and tax policies affect individual behavior and how governments set policies Integrated theory and analysis Institutional theoretical and empirical material is interwoven to provide students with a clear and coherent view of how government spending and taxation relate to economic theory Current research is presented alongside discussion of methodological and substantive controversies The approach is modern theoretical and empirical and shared by most active economists Institutional and legal settings are described in detail and the links between economic analysis and current political issues are emphasized This Global Edition has been adapted to meet the needs of courses outside of the United States and does not align with the instructor and student resources available with the US edition **Australian National**

Stanbury,George Yarrow,Richard Zeckhauser,2012-12-06 The book is divided into three major sections The first presents a theoretical discussion that underlies the other essays The second section deals with privatization issues from the perspective of the United States The third describes research addressed to the U K and Canada In the first chapter Richard Zeckhauser and Murray Horn develop a wide ranging theoretical framework for assessing the capabilities and role of state owned enterprises it provides a foundation for the analyses that follow In The Control and Performance of State Owned Enterprises they describe state owned enterprises as an extreme case of the separation of ownership and control The focus is on management the incentives it faces and the conflicts to which it is subjected The distinguishing characteristics of public enterprise the authors suggest give it a comparative advantage over both public bureaucracy and private enterprise in certain situations They argue that legislators are more likely to prefer SOEs over private enterprise when the efficiency of private enterprise is undermined by regulation or the threat of opportunistic state action when the informational demands of subsidizing private production to meet distributional objectives are high when it is difficult to assign property rights or when state ownership is ideologically appealing These considerations suggest why SOEs are usually assigned special rights and responsibilities and they help explain observed regularities in the distribution of SOEs across countries and sectors Zeckhauser and Horn apply principal agent theory to identify the key factors underlying the performance of state owned enterprises
