 Fitzsimmons,2015-07-16 This book explores the use of deadly force by private security companies during the Iraq War The
 work focuses on and compares the activities of the US companies Blackwater and DynCorp Despite sharing several important
 characteristics such as working for the same client the US State Department during the same time period the employees of
 Blackwater fired their weapons far more often and killed and seriously injured far more people in Iraq than their
 counterparts in DynCorp In order to explain this disparity the book undertakes the most comprehensive analysis ever
 attempted on the use of violence by the employees of these firms Based on extensive empirical research it offers a credible
 explanation for this difference Blackwater maintained a relatively bellicose military culture that placed strong emphasis on
 norms encouraging its personnel to exercise personal initiative proactive use of force and an exclusive approach to security
 which together motivated its personnel to use violence quite freely against anyone they suspected of posing a threat
 Specifically Blackwater s military culture motivated its personnel to fire upon suspected threats more quickly at greater
 distances and with a greater quantity of bullets and to more readily abandon the people they shot at when compared to
 DynCorp s personnel who maintained a military culture that encouraged far less violent behaviour Utilizing the Private
 Security Company Violent Incident Dataset PSCVID created by the author in 2012 the book draws upon data on hundreds of
 violent incidents involving private security personnel in Iraq to identify trends in the behaviour exhibited by the employees of
 different firms Based on this rich and original empirical data the book provides the definitive study of contemporary private
 security personnel in the Iraq War This book will be of much interest to students of the Iraq War Private Security Companies
