development including management and design of green infrastructure waste management run off purification and remediation of urban soils The SSC conference and its proceedings offer a valuable contribution to sustainable urban development and are of interest to the scientific and research community municipal services environmental protection agencies landscape architects civil engineers policy makers and other stakeholders in urban management and greenery

Alcoholism and Substance Abuse Gary G. Forrest,1985 *Challenge of Child Welfare* Kenneth L. Levitt,Brian Wharf,2011-11-01 I think this book in assembling the views of a distinguished group of professionals can have a profound effect on child welfare theory and practice These practitioners critics and academics have much to say I for one am grateful that their views are now conveniently available to all of us in this book from the foreword by Thomas R Berger Chairman the British Columbia Royal Commission on Family and Children s Law The first Canadian text on child welfare this work examines a number of issues which represent the state of the art of child welfare in Canada Among the contributors are practitioners as well as academics from the fields of social work child care law and medicine Important government studies and reports in the 1970 s did much to define existing problems in child welfare and to provide directions for their solutions The developments and research reported in this book add to their findings Several main themes emerge in the book one being the lack of standardization of child welfare policy and practice in Canada since each province has its own regulations and policies Other concerns common to many of the authors are the dismantling of social service programmes as a result of the current recession and the need for greater cooperation with the native Indian leadership in regard to the provision of child welfare services to the Indian community Another important theme touched on by several authors concerns children in the care of welfare agencies They discuss how adequate the range and quality of services are and how the effect of these services can be measured The final theme centers on prevention and the early identification of families whose children may be at risk without certain support services The point of view which transcends all the contributions supports an institutional approach where a range of services is available to families to choose from as opposed to the residual approach which regards government services as the last resort While it is the latter view that is prevalent in Canda today the authors argue that this represents a penny wise but pound foolish approach not only to child welfare but also to the broader field of social welfare
