Model Validation for Power System

Frequency Analysis Hossein Seifi, Hamed Delkhosh, 2018-10-16 This book examines the role of model validation of power system planning and operation to optimize its performance in terms of frequency control. It presents the detailed model validation for the Iranian Power Grid system where the frequency performance was analysed and improved using existing and new standard models to identify the influencing parameters. Although the model validation was employed for a specific practical large scale system, the framework concepts, methods and formulations can be used for by any type of power system. As such, this book describing a generalized framework for model validation with a real case study is useful for both power industry experts and academia.

Generative AI for Web Engineering Models Shah, Imdad Ali, Jhanjhi, Noor Zaman, 2024-10-22 Web engineering faces a pressing challenge in keeping pace with the rapidly evolving digital landscape. Developing, designing, testing and maintaining web based systems and applications require innovative approaches to meet the growing demands of users and businesses. Generative Artificial Intelligence (AI) emerges as a transformative solution offering advanced capabilities to enhance web engineering models and methodologies. This book presents a timely exploration of how Generative AI can revolutionize the web engineering discipline, providing insights into future challenges and societal impacts. Generative AI for Web Engineering Models offers a comprehensive examination of integrating AI driven generative approaches into web engineering practices. It delves into methodologies, models and the transformative impact of Generative AI on web based systems and applications. By addressing topics such as web browser technologies, website scalability, security and the integration of Machine Learning, this book provides a roadmap for researchers, scientists, postgraduate students and AI enthusiasts interested in the intersection of AI and web engineering.

The Selected Works of George J. Benston, Volume 1 James D. Rosenfeld, 2010-05-13 George J. Benston, professor of Finance, Accounting and Economics at Emory University's Goizueta Business School, died unexpectedly in January 2008. He was an impassioned advocate for corporate integrity and a unique scholar; his research interests were as broad as those of any recent academician. His colleagues have selected and organized his most important papers into two volumes. This first volume consists of his research in the banking and financial services industry. The editor has selected a broad range of papers from each of the major areas that are representative of Benston's work in that particular field. James D. Rosenfeld, Professor of Finance, Accounting and Economics, Goizueta Business School, Emory University, serves as the editor and is assisted by an editorial advisory board.
