Energy Gerard M Crawley,2013-01-28 Competition for energy resources worldwide will almost certainly increase because of population growth and economic expansion especially in countries such as China and India with large populations In addition environmental concerns with the use of certain energy sources add a complicating factor to decisions about energy use Therefore there is likely to be an increased commitment around the world to invest in energy systems The World Scientific Handbook of Energy provides comprehensive reliable and timely sets of data on energy resources and uses it gathers in one publication a concise description of the current state of the art for a wide variety of energy resources including data on resource availability worldwide and at different cost levels The end use of energy in transportation residential and industrial areas is outlined and energy storage conservation and the impact on the environment included Experts and key personnel straddling academia and related agencies and industries provide critical data for further exploration and research Experts in these various areas who provide relevant data for further exploration and research include former Head of the Nuclear Reactors Directorate of the CEA Director of the Potential Gas Agency who leads a team of 100 geologists geophysicists and petroleum engineers former CEO of an Icelandic engineering company that specializes in the design construction and operation of Kalina binary power plants for geothermal biomass and industrial waste heat recovery applications Chairman of the Scottish Hydrogen and Fuel Cells Association former Director of the Geo Heat Center at the Oregon Institute of Technology who received the Patricius Medal from the German Geothermal Association for his pioneer work in the direct use of geothermal energy Division Director of NETL's Strategic Center for Coal who provides expert guidance and consultation to major DOE funded clean coal technology and carbon sequestration demonstration projects an internationally recognized expert in the physics and technology of Inertial Confinement Fusion ICF former Senior Scientist and Director of the Center for Distributed Generation and Thermal Distribution with Washington State University who was responsible for state policy technical assistance to resource developers and investigations related to geothermal energy development a main author on the 2005 Billion Ton Report and 2011 Billion Ton Update and many more extremely well published and well known individuals straddling academia and related agencies and industries *Straddling Class in the Academy* Sonja Ardoin,becky martinez,2023-07-03 Why do we feel uncomfortable talking about class Why is it taboo Why do people often address class through coded terminology like trashy classy and snobby How does discriminatory language or how do conscious or unconscious derogatory attitudes or the anticipation of such behaviors impact those from poor and working class

backgrounds when they straddle class Through 26 narratives of individuals from poor and working class backgrounds ranging from students to multiple levels of administrators and faculty both tenured and non tenured this book provides a vivid understanding of how people can experience and straddle class in the middle upper or even elitist class contexts of the academy Through the powerful stories of individuals who hold many different identities and naming a range of ways they identify in terms of race ethnicity gender sexuality age ability and religion among others this book shows how social class identity and classism impact people s experience in higher education and why we should focus more attention on this dimension of identity The book opens by setting the foundation by examining definitions of class discussing its impact on identity and summarizing the literature on class and what it can tell us about the complexities of class identity its fluidity sometimes performative nature and the sense of dissonance it can provoke This book brings social class identity to the forefront of our consciousness conversations and behaviors and compels those in the academy to recognize classism and reimagine higher education to welcome and support those from poor and working class backgrounds Its concluding chapter proposes means for both increasing social class consciousness and social class inclusivity in the academy It is a compelling read for everyone in the academy not least for those from poor or working class backgrounds who will find validation and recognition and draw strength from its vivid stories

Getting (more out of) Graphics Antony Unwin, 2024-09-13 Data graphics are used extensively to present information Understanding graphics is a lot about understanding the data represented by the graphics having a feel not just for the numbers themselves the reliability and uncertainty associated with them but also for what they mean This book presents a practical approach to data visualisation with real applications front and centre The first part of the book is a series of case studies each describing a graphical analysis of a real dataset The second part pulls together ideas from the case studies and provides an overview of the main factors affecting understanding graphics Key Features Explains how to get insights from graphics Emphasises the value of drawing many graphics Underlines the importance for analysis of background knowledge and context Readers may be data scientists statisticians or people who want to become more visually literate A knowledge of Statistics is not required just an interest in data graphics and some experience of working with data It will help if the reader knows something of basic graphic forms such as barcharts histograms and scatterplots
