

# PDCA CYCLE

ISO 45001 has adopted the four stage Plan-Do-Check-Act (PDCA) cycle for achieving continual improvement. This is an inherent part of the systematic approach to determine workable solutions, assessing the results, and implementing ones that have been shown to work.

The PDCA cycle can be applied not only to management systems as a whole, but also to each individual element to provide an ongoing focus on continual improvement. At the core of each stage is "Top Management" who are pivotal to ensure the OHS&S system is managed effectively.

In the context of ISO 45001, refer to the following PDCA cycle:

## Plan:

Understand the context of the organisation including OHS&S risk and opportunities. Establish OHS&S objectives, processes and resources required to deliver results in accordance with the organisational OHS&S Policy.

## Do:

Implement the processes as planned to include worker participation, hazard identification and emergency preparedness.

## Check:

Monitor, measure and evaluate OHS&S activities and processes.

## Act:

Take actions to continually improve by including findings of incidents, addressing non-conformance and audit findings.
