## Insert Electrical Raceway Data

This option is required to integrate an Electrical Raceway project into the PD\_Shell environment for a previously created PDS project. It defines the location of an existing Electrical Raceway project directory and Reference Database.

This option is only displayed on the **Project Setup Manager** main form if no electrical raceway data has been defined for the active project.

**[NOTE]** To avoid creating models with incorrect working unit settings, adjust the working unit settings of Raceway seed files after creating the projects, and *before* creating models.

### Before Using This Command

The Electrical Raceway project to be inserted must have already been created with the Electrical Raceway product. Make sure there is no schema password for the Raceway schema.

The system expects that an electrical project configuration file, .EErc, reside in the project directory. This configuration file assigns an environment variable, EES\_REFDB, to define the relational database schema name for the project's Electrical Raceway Reference Database.

1. Choose the **Insert Electrical Raceway Data** option from the **Project Setup Manager** main form.

*The Insert Electrical Raceway Project form is displayed.*
