develop and explore the idea with specific reference to the ways in which diasporas could act as translocal societies connecting worlds and peoples that may not otherwise have been linked The volume looks at the ways in which diasporas or diasporic groups such as the Herrnhuters the Huguenots the Quakers Jews the Mennonites the Moriscos and others could function as intermediaries to connect otherwise separated communities and societies All contributors analyse the respective groups internal and external networks social relations and the settings of social interactions looking at the entangled networks of diaspora communities and their effects upon the societies and regions they linked through those networks The collection takes a fresh look at early modern diasporas combining religious cultural social and economic history to better understand how early modern communication patterns and markets evolved how consumption patterns changed and what this meant for social economic and cultural change how this impacted on what we understand as early developments towards globalization and how early developments towards globalization in turn were constitutive of these

*Nutritional influences on human neurocognitive functioning* Michael Smith,Andrew Scholey,2014-11-04 You are what you eat It s a saying that we ve all heard time and time again The notion that good nutrition is essential for adequate growth and sound physical wellbeing is very well established Further in recent years there has been an overwhelming increase in research dedicated to better understanding how nutritional factors influence cognition and behaviour For example several studies have suggested that higher foetal exposure to omega 3 fatty acids and B vitamins such as folate promotes neurodevelopment B vitamins may also play a role in neurocognitive functioning in later life with some suggestion that lower vitamin B levels are associated with increased risk of dementia although randomised controlled trials investigating B vitamin supplementation as a cognitive enhancer in the elderly have provided inconclusive evidence as to the benefits of such therapy for dementia In fact the nutritional

underpinnings of Alzheimer's disease and other disorders of cognitive ageing is becoming a much researched topic. In addition, consumption of several other foods has been found to convey more acute cognitively enhancing effects. For example, ingestion of carbohydrates e.g. glucose, caffeine, resveratrol and several nutraceutical/herbal extracts has been associated with short-term improvements in cognitive performance. Beyond specific micronutrients and macronutrients, the current literature seems to support anecdotal evidence that consumption of a balanced breakfast is crucial to various measures of school performance, including attention in the classroom. What is clear from this emerging literature is that the relationship between nutritional status and neurocognitive functioning at various stages of the lifespan is complex. An aim of this Research Topic is to bring together some recent empirical findings, reviews and commentaries of the literature to date and opinion pieces relating to future directions for this burgeoning field. **Studied Ignorance** Herbert N. Foerstel, 2013-05-23. Despite concerted efforts from our educators, administrators and government, American education continues to struggle. The author of this work argues that the decline can be traced to censored curricula, inaccurate textbooks, test-driven evaluations and increasing poverty among the student population. Under the definition of failure specified in the No Child Left Behind Act, more than 80 percent of American schools could currently be labeled as failing, while the quality of American education overall and our students' performance continue to rank unfavorably against international competition. This book examines the crisis in American education and identifies how weaknesses in textbooks, teaching and testing have created the crisis facing American education, a topic that dramatically affects students, teachers and parents. Author Herbert N. Foerstel exposes the textbook wars that began a century ago and rage on with even more venom today. His book traces the legal basis for curricular censorship that dates back 75 years, identifies the bizarre process by which shoddy textbooks have been written, published and come to be widely accepted, and documents the disastrous effect that reliance on these materials has had on the curriculum. Foerstel also supplies a careful assessment of the current political debate over education reform and of the proposed solutions to these problems.

Sensory-Enhanced Yoga® for Self-regulation and Trauma Healing Carolyn Stoller, 2019-11-25. Lynn Stoller, OT, MS, OTR, C-IAYT, RYT500, E-RYT200 and outstanding expert contributors skilfully synthesize theoretical concepts and research findings from the fields of occupational therapy, trauma psychology, neuroscience and traditional Eastern yogic philosophy to produce a Transdisciplinary Model for Post-Traumatic Growth for healing symptoms of combat stress, PTSD or other unresolved trauma or anxiety disorders. The model is informed by the highly successful yoga treatment protocol used with U.S. military personnel deployed to Kirkuk, Iraq, which the author co-developed (Stoller et al. 2012) and by her experiences teaching yoga to veterans in her local community. Sensory-Enhanced Yoga R is designed to help meet the following goals: Decrease hypervigilance and overreaction to sensory input e.g. visual crowds, touch, noise, movement. Improve quality of sleep and energy level to support wellness and enhance daily productivity. Decrease intrusive thoughts by learning to become present.

through breath and body awareness Enhance one's sense of self worth and personal empowerment Whether you are a therapist looking for effective treatment tools for your clients or are seeking healing for yourself this insightful book will provide you with effective strategies to help promote peace of mind and full engagement in life Lynn's website [www.sensoryenhancedyoga.org](http://www.sensoryenhancedyoga.org)
