It also acts as an introduction to the archaeology of medicine for archaeologists interested in this aspect of their subject. This volume offers the first systematic investigation of its myriad roles and manifestations in the ancient Mediterranean and Near East. The twenty-nine contributors represent a broad range of scholarly disciplines seeking answers to fundamental questions regarding the patterns and commonalities of this vital aspect of the past. How was the experience construed and by what means was it achieved? Who was involved? Where and when were rites carried out? How was it reflected in pictorial arts and written records? What was its relation to other components of the sociocultural compact? In proposing responses the authors draw upon a wealth of original research in many fields generating new perspectives and thought provoking often surprising conclusions. With their abundant cross-cultural and cross-temporal references the chapters mutually enrich each other and collectively deepen our understanding of ecstatic phenomena thousands of years ago. Another noteworthy feature of the book is its illustrative content including commissioned reconstructions of ecstatic scenarios and pairings of works of Bronze Age and modern psychedelic art. Scholars students and other readers interested in antiquity comparative religion and the social and cognitive sciences will find much to explore in the fascinating realm of ecstatic experience in the ancient world.     *The Routledge Companion to Medieval English Literature* Raluca Radulescu, Sif Rikhardsdottir, 2022-12-30 The Routledge

**Archaeology of Logic** Andrew Schumann, 2023-04-27 The question arises whether logic was given to us by God or whether it is the result of human evolution I believe that at least the modus ponens rule A and if A then B implies B is inherent in humans but probably many other modern systems e g resource logic non monotonic logic etc are the result of humans adapting to the environment It is therefore of interest to study and compare the way logic is used in ancient cultures as well as the way logic is going to be used in our 21st century This welcome book studies and compares the way formation of logic in three cultures Ancient Greek 4th century B C Judaic 1st century B C 1st century A D and Indo Buddhist 2nd century A D The book notes that logic became especially popular during the period of late antiquity in countries covered by the international trade of the Silk Road This study makes a valuable contribution to the history of logic and to the very understanding of the origins and nature of logical thinking Prof Dov Gabbay King's College London UK Andrew Schumann in his book demonstrates that logic step by step arose in different places and cultural circles He argues that if we apply a structural genealogical method as well as turn to various sources particularly religious philosophical linguistic etc then we can obtain a more general and more adequate picture of emergence and development of logic This book is a new and very valuable contribution to the history of logic as a manifestation of the human mind Prof Jan Wolenski Jagiellonian University Poland The author of the Archaeology of Logic defends the claim calling it logic is after all which sees logical competence as a practical skill that people began to learn in antiquity as soon as they realized that avoiding cognitive biases in their reasoning would make their daily activities more successful The in depth reading of the book with its diving into the comparative quotations in the long dead or hardly known to most of us languages like Sumerian Akkadian Aramaic Hebrew and etc will be rewarded by the response that the logical competence is diverse and it can be trained despite the inevitability of the reasoning fallacies and that critical discussions and agonial character of the social life are the necessary tools for that Prof Elena Lisanyuk

**Life-writing in the History of Archaeology** Gabriel Moshenska, Clare Lewis, 2023-07-10 Life writing is a vital part of the history of archaeology and a growing field of scholarship within the discipline The lives of archaeologists are entangled with histories of museums and collections developments in science and scholarship and narratives of nationalism and colonialism into the present In recent years life writing has played an important role in the surge of new research in the history of archaeology including ground breaking studies of discipline formation institutionalisation and social and intellectual networks Sources such as diaries wills film and the growing body of digital records are powerful tools for highlighting the contributions of hitherto marginalised archaeological lives including many

pioneering women hired labourers and other hidden hands This book brings together critical perspectives on life writing in the history of archaeology from leading figures in the field These include studies of archive formation and use the concept of dig writing as a distinctive genre of archaeological creativity and reviews of new sources for already well known lives Several chapters reflect on the experience of life writing review the historiography of the field and assess the intellectual value and significance of life writing as a genre Together they work to problematise underlying assumptions about this genre foregrounding methodology social theory ethics and other practice focused frameworks in conscious tension with previous practices

**Wooden Images** Juanita Ballew Wood,1999 Using 163 photographs of images carved on the underside of medieval choir stalls in the churches and cathedrals of England in the thirteenth through sixteenth centuries this work provides a spirited examination of the social history of ordinary men and women during the late medieval period This examination is particularly useful in that the choir stalls have become less accessible to the public in recent years Misericords have received some scholarly attention but this work is the first to interpret the carvings as social commentary They are not examined as decorative embellishments or pieces of church furniture but rather read as intimate glimpses into the thoughts actions and beliefs of a segment of the English medieval population Whatever amused angered frightened or elated the common person is recorded here in these extraordinary records

**Exploring Ancient Skies** David H. Kelley,Eugene F. Milone,2011-02-16 Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean the Far East and the New World particularly Mesoamerica putting the ancient astronomical materials into their archaeological and cultural contexts The authors begin with an overview of the field and proceed to essential aspects of naked eye astronomy followed by an examination of specific cultures The book concludes by taking into account the purposes of ancient astronomy astrology navigation calendar regulation and not least the understanding of our place and role in the universe Skies are recreated to display critical events as they would have appeared to ancient observers events such as the supernova of 1054 A D the lion horoscope and the Star of Bethlehem Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation It will be useful as a reference for scholars and as a text for students in both astronomy and archaeology and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history
