Organisational Change Dianne Waddell,Andrew Creed,Thomas G. Cummings,Christopher G. Worley,2016-08-31 Change

Management is a crucial process for gaining the competitive advantage that is the goal of many organisations. Leaders and change agents are often faced with conflicting challenges of motivating and understanding increasingly diverse workforces, accounting to stakeholders and planning for the future in a chaotic environment. Comprising 12 chapters in 6 parts, the text opens with an explanation of the environment of change faced by organisations today. It then deals with managing organisational development, which is a planned process of change which is often subject to the incursions of organisational transformation, a more dramatic and unpredictable type of change. With the field of organisational change continuing to evolve, especially in an international context, future directions of change management are also discussed. Finally, to emphasise the relationship between theory to practice, *Organisational Change Development and Transformation 6e* provides 10 local and international case studies and a suite of online cases supported by a case matrix. Case studies, exercises and support material present the challenges of change management in a real life manner, examining issues from a variety of viewpoints.

Dissent and the Failure of Leadership Stephen P. Banks, 2010-01-01. This timely collection of original papers explores the vital but largely unrecognized connections between leadership and dissent. In an era when leadership failures can mean homelessness and even death for countless flood victims, losses of life savings for employees of bankrupt corporations, civilian deaths and ravaged societies in the Middle East and incalculable suffering among refugees in central Africa, the studies presented here offer analysis and correctives based on new understandings of the dissent leadership relationship. The book examines how dissent is implicated in problems plaguing theory development in leadership studies. Topics explored within this framework include dissent in corporate discourses of control, real and manufactured crises, cross generational perceptions, women leaders, personal and work lives, the professionalization of journalism, religious institutions, activist public relations and fear based cultures. It concludes with new proposals for legitimating dissent as a unique instrument for advancing social development and avoiding failures of leadership. Examining dissent as the critical factor that differentiates leadership failures and successes from interdisciplinary perspectives, this illuminating book will be of great interest to advanced students and teachers of leadership studies as well as corporate executives, policymakers and other leaders aware of the need to improve leadership practices.
