The Slain God Anthropologists And The Christian Faith:

The Slain God Timothy Larsen, 2014-08-29 Throughout its entire history the discipline of anthropology has been perceived as undermining or even discrediting Christian faith. Many of its most prominent theorists have been agnostics who assumed that ethnographic findings and theories had exposed religious beliefs to be untenable. E. B. Tylor, the founder of the discipline in Britain, lost his faith through studying anthropology. James Frazer saw the material that he presented in his highly influential work *The Golden Bough* as demonstrating that Christian thought was based on the erroneous thought patterns of savages. On the other hand, some of the most eminent anthropologists have been Christians, including E. E. Evans Pritchard, Mary Douglas, Victor Turner, and Edith Turner. Moreover, they openly presented articulate reasons for how their religious convictions cohered with their professional work. Despite being a major site of friction between faith and modern thought, the relationship between anthropology and Christianity has never before been the subject of a book-length study. In this groundbreaking work, Timothy Larsen examines the point where doubt and faith collide with anthropological theory and evidence.

It covers discussions of positionality in the study of African Christianity, interdisciplinary methods and approaches, and a number of case studies on political, social, and ecological aspects of African Christian spirituality.

approaches to other communities Balm in Gilead Timothy Larsen, Keith L. Johnson, 2019-04-02 Pulitzer Prize winning novelist Marilynne Robinson is one of the most eminent public intellectuals in America today and her writing offers probing meditations on the Christian faith Based on the 2018 Wheaton Theology Conference this volume brings together the thoughts of leading theologians historians literary scholars and church leaders who engaged in theological dialogue with Robinson's work and with the author herself Occult Roots of Religious Studies Yves Mühlematter, Helmut Zander, 2021-06-08 The historiographers of religious studies have written the history of this discipline primarily as a rationalization of ideological most prominently theological and phenomenological ideas first through the establishment of comparative philological and sociological methods and secondly through the demand for intentional neutrality This interpretation caused important roots in occult esoteric traditions to be repressed This process of purification Latour is not to be equated with the origin of the academic studies De facto the elimination of idealistic theories took time and only happened later One example concerning the early entanglement is Tibetology where many researchers and respected chair holders were influenced by theosophical ideas or were even members of the Theosophical Society Similarly the emergence of comparatistics cannot be understood without taking into account perennialist ideas of esoteric provenance which hold that all religions have a common origin In this perspective it is not only the history of religious studies which must be revisited but also the partial shaping of religious studies by these traditions insofar as it saw itself as a counter model to occult ideas **The Christian Invention of Time** Simon Goldhill, 2022-02-03 With trademark flair Simon Goldhill shows how Christianity transformed humanity's relationship with time in ways that resonate today **The Oxford Handbook of the Oxford Movement** Stewart J. well as on the formation of a world wide Anglicanism In Part VII the contributors show how the Oxford Movement remained a vital force in the twentieth century finding expression in the Anglo Catholic Congresses and in the Prayer Book Controversy of the 1920s within the Church of England The Handbook draws to a close in Part VIII with a set of more generalised reflections on the impact of the Oxford Movement including chapters on the judgement of the converts to Roman Catholicism over the Movement's loss of its original character on the spiritual life and efforts of those who remained within the Anglican Church to keep Tractarian ideas alive on the engagement of the Movement with Liberal Protestantism and Liberal Catholicism and on the often contentious historiography of the Oxford Movement which continued to be a source of church party division as late as the centennial commemorations of the Movement in 1933 An Afterword chapter assesses the continuing influence of the Oxford Movement in the world Anglican Communion today with special references to some of the conflicts and controversies that have shaken Anglicanism since the 1960s

Beyond Description Paolo Heywood, Matei Candea, 2023-12-15 Beyond Description brings anthropologists and other social scientists together to examine the problem of explanation What is an explanation What can it add What makes it authoritative clarifying or misleading Whom does it serve and how is it produced These questions lie at the heart of recent public crises of confidence in expertise political representation and classic liberal visions of whom we can rely on for true and trustworthy accounts In a world beset by events and processes that seem to defy expert predictions of their impossibility and in which post hoc accounts can often feel more like rationalizations than explanations competing voices vie for public presence and seek to silence one another Anthropology and the social sciences face such questions too making contemporary explanatory practice both an empirical and a reflexive challenge By combining ethnographic studies of practices of explanation in a range of contemporary political medical artistic religious and bureaucratic settings the essays in Beyond Description offer critical examinations of changing norms and forms of explanation in the world and within anthropology itself

theory and practice of missions Using the metaphor of a river the book shows how theories upstream such as theology education anthropology community development and history have exerted an influence on missiology and missiology in turn has gone back upstream to influence those disciplines What causes these disciplines to converge in missiology is the goal of making disciples across cultures Whereas missiologists are not always explicit about how their abstract theories actually relate to the task of making disciples across cultures each chapter in Advanced Missiology shows how numerous theories sub fields models and strategies of missiology ultimately facilitate the Great Commission The book argues that by using interdisciplinarity for this fundamental purpose missiological studies will be more credible and useful With contributions from Rebecca Burnett Leanne Dzubinski Julie Martinez
