The Sweet Gum Tree Katherine Allred, 2017 Sweet tea corn bread and soup beans everyday fare for eight year old Alix French the precocious darling of a respected southern family But nothing was ordinary about the day she met ten year old Nick Anderson a boy from the wrong side of town Armed with only a tin of bee balm and steely determination Alix treats the raw evidence of a recent beating that mars his back an act that changes both their lives forever Through childhood disasters and teenage woes they cling together as friendship turns to love The future looks rosy until the fateful night when Frank Anderson Nick s abusive father is shot to death in his filthy trailer Suddenly Nick is gone leaving Alix alone confused and pregnant For the next fifteen years she wrestles with the pain of Nick s abandonment a bad marriage her family and friends But finally she s starting to get her life back together Her divorce is almost final her business is booming and she s content if not happy until the day she looks up and sees Nick standing across the counter He s back and he s not alone Once again Alix is plunged into turmoil and pain as Nick tries to win her love something she resists with all her strength Only one thing might break the protective wall she s built around her emotions the truth about Frank Anderson s death But when that truth comes out and those walls crumble neither Alix nor Nick is prepared for the emotional explosion that could destroy as well as heal

Teaching the Trees Joan Maloof,2010-09-15 In this collection of natural history essays biologist Joan Maloof embarks on a series of lively fact filled expeditions into forests of the eastern United States Through Maloof s engaging conversational style each essay offers a lesson in stewardship as it explores the interwoven connections between a tree species and the animals and insects whose lives depend on it and who in turn work to ensure the tree s survival Never really at home in a laboratory Maloof took to the woods early in her career Her enthusiasm for firsthand observation in the wild spills over into her writing whether the subject is the composition of forest air the eagle s preference for nesting in loblolly pines the growth rings of the bald cypress or the gray squirrel s fondness for weevil infested acorns With a storyteller s instinct for intriguing particulars Maloof expands our notions about what a tree is through her many asides about the six species of leafhoppers who eat only sycamore leaves or the midges who live inside holly berries and somehow prevent them from turning red As a scientist Maloof accepts that trees have a spiritual dimension that cannot be quantified As an unrepentant tree hugger she finds support in the scientific case for biodiversity As an activist she can t help but wonder how much time is left for our forests
