TESOL Guide for Critical Praxis in Teaching, Inquiry, and Advocacy Crawford, Jenifer, Filback, Robert A., 2021-09-17 The field of TESOL encompasses English teachers who teach English as an additional language in English dominant countries and those teachers who teach English as a foreign language in countries where a language other than English is the official language This range of educators teaches English to children adolescents and adults in primary secondary post secondary popular education and language academies or tutoring centers The diversity of learners and contexts within the TESOL field presents a unique opportunity for educators to address varied educational and societal needs This opportunity calls for TESOL educators who can support the whole learner in a range of contexts for the greater social good There is an urgent need for readily reproducible and step by step research based practices and current standards in TESOL that bridge the gap between critical scholarship and equitable teaching practices This book would serve as a critical addition to current literature in TESOL TESOL Guide for Critical Praxis in Teaching Inquiry and Advocacy is an essential reference that provides practical and equitable step by step guides for TESOL educators through the current best practices and methods for effective and equity minded teaching critical inquiry and transformative advocacy This book is of particular value as it bridges theories to practices with a critical look at racial and social justice in English language teaching which will lead to the integration of social justice focused practice across the new curriculum Covering topics such as integrated language instruction equity and inclusivity critical consciousness and online learning this text is essential for in service and pre service TESOL educators education students researchers administrators teacher educators and academicians *How to Enhance Learning Efficiency When Online Learning is Popular and Indispensable: Theory, Research and Practice* Rong Lian, Chang Liu ,Juzhe Xi, 2024-07-17 Online learning has become more and more common globally whether for comfort adapting to work hours or just having the freedom to study from anywhere And now under the coronavirus pandemic as people are having to stay at home it has become more important than ever Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance Relevant research in cognitive science has revealed possible limitations in online learning For example the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult for learners to form a systematic knowledge structure Learners may experience cognitive overload metacognitive illusion and low learning efficiency in self regulated learning It follows that in the post COVID 19 era online learning puts forward new requirements and challenges to the contemporary students not only to their learning strategies but positive character traits in learning Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation then possibly leading to inefficient learning and increased learning burden Therefore it is necessary and important to reexplore the influencing factors and mechanisms that affect the

learning efficiency of students at all levels nowadays based on which we could construct a theoretical model of efficient learning model      **Kozier & Erb's Fundamentals of Nursing Australian Edition** Audry Berman, Shirlee J.

**Assessment, Testing, and Measurement Strategies in Global Higher Education** Railean, Elena Aurel,2020-01-03 Teachers assist students in order to gain data and to determine whether the instructional objectives have been met Usually the assessment process takes place as part of ongoing learning and teaching periodically and at key transitions The term assessment refers to the wide variety of methods procedures and tools used to determine what students know learn and how they apply knowledge in concrete situations Assessment Testing and Measurement Strategies in Global Higher Education is a comprehensive synthesis of correlations between assessment testing and measurement in the context of global education It analyzes the impact of educational technology on learning analytics challenges of rapidly changing learning environments and computer based assessment Featuring an assortment of topics such as educational technologies risk management and metacognition this book is optimal for academicians higher education faculty deans performance evaluators practitioners curriculum designers researchers administrators and students      Cooperative Control of Multi-Agent Systems with Uncertainties Hao Zhang,Chao Huang,Zhuping Wang,Huaicheng Yan,2024-04-04 Multi agent coordination is an emerging

engineering It has been inspired by the observations and descriptions of collective behavior in nature such as fish schooling birds flocking and insects swarming The advantages of multi agent coordination include it can reduce cost and complexity from hardware platform to software and algorithms in addition multi agent systems are capable of many tasks which could not be effectively performed by a single robot system for example the surveillance task The book proposes a hierarchical design framework that places uncertainties related to system models in the decentralized control layer bottom layer and the ones related to the communication as well as physical interaction between the agents in the distributed decision making layer top layer The book shows that the two layers meet the separation principle under certain conditions so that through the two layer design framework any challenges can be resolved independently and the design complexity will not increase with the level of uncertainties In addition in order to solve the problem of energy limitation of agents this book also studies the event driven cooperative control of multi agent systems which can effectively reduce the energy consumption of agents and increase their operational life span Bridges the gap for engineers and technicians in the automation industry including theory and practice Provides a general framework for dealing with various uncertainties in multi agent cooperative control problems Contains contributions surrounding the development of multi agent systems control theory     Resources in Education ,2001-10     **Cloud Computing** Dan C. Marinescu,2017-11-20 Cloud Computing Theory and Practice Second Edition provides students and IT professionals with an in depth analysis of the cloud from the ground up After an introduction to network centric computing and network centric content in Chapter One the book is organized into four sections Section One reviews basic concepts of concurrency and parallel and distributed systems Section Two presents such critical components of the cloud ecosystem as cloud service providers cloud access cloud data storage and cloud hardware and software Section Three covers cloud applications and cloud security while Section Four presents research topics in cloud computing Specific topics covered include resource virtualization resource management and scheduling and advanced topics like the impact of scale on efficiency cloud scheduling subject to deadlines alternative cloud architectures and vehicular clouds An included glossary covers terms grouped in several categories from general to services virtualization desirable attributes and security Includes new chapters on concurrency cloud hardware and software challenges posed by big data and mobile applications and advanced topics Provides a new appendix that presents several cloud computing projects Presents more than 400 references in the text including recent research results in several areas related to cloud computing     Smart Energy and Electric Power Systems Sanjeevikumar Padmanaban,Jens Bo Holm-Nielsen,Kayal Padmanandam,Rajesh Kumar Dhanaraj,Balamurugan Balusamy,2022-09-17 Smart Energy and Electric Power Systems Current Trends and New Intelligent Perspectives reviews key applications of intelligent algorithms and machine learning techniques to increasingly complex and data driven power systems with distributed energy resources to enable evidence driven decision making and mitigate catastrophic power shortages The book reviews foundations towards the integration of machine learning and smart power

systems before addressing key challenges and issues The work then explores AI and ML informed techniques to rebalancing of supply and demand Methods discussed include distributed energy resources and prosumer markets electricity demand prediction component fault detection and load balancing Security solutions are introduced along with potential solutions to cyberattacks security data detection and critical loads in power systems The work closes with a lengthy discussion informed by case studies on integrating AI and ML into the modern energy sector Helps improve the prediction capability of AI algorithms to make evidence based decisions in the smart supply of electricity including load shedding Focuses on how to integrate AI and ML into the energy sector in the real world with many chapters accompanied by case studies Addresses a number of proven AI and ML informed techniques in rebalancing supply and demand
