Porter,2004 Theodore Porter s portrait of Pearson extends from religious crisis and sexual tensions to metaphysical and even mathematical anxieties Pearson sought to reconcile reason with enthusiasm and to achieve the impersonal perspective of science without sacrificing complex individuality Even as he longed to experience nature directly and intimately he identified science with renunciation and positivistic detachment Porter finds a turning point in Pearson s career where his humanistic interests gave way to statistical ones in his Grammar of Science 1892 in which he attempted to establish scientific method as the moral educational basis for a refashioned culture BOOK JACKET *Catalog of Copyright Entries. Introduction to Statistical Inference Jack C. Kiefer,2012-12-06 This book is based upon lecture notes developed by Jack Kiefer for a course in statistical inference he taught at Cornell University The notes were distributed to the class in lieu of a textbook and the problems were used for homework assignments Relying only on modest prerequisites of probability theory and cal culus Kiefer s approach to a first course in statistics is to present the central ideas of the modem mathematical theory with a minimum of fuss and formality He is able to do this by using a rich mixture of examples pictures and math ematical derivations to complement a clear and logical discussion of the important ideas in plain English The straightforwardness of Kiefer s presentation is remarkable in view of the sophistication and depth of his examination of the major theme How should an intelligent person formulate a statistical problem and choose a statistical procedure to apply to it Kiefer s view in the same spirit as Neyman and Wald is that one should try to assess the consequences of a statistical choice in some quan titative frequentist formulation and ought to choose a course of action that is verifiably optimal or nearly so without regard to the perceived attractiveness of certain dogmas and methods   Catalog United States Armed Forces Institute,1971
