In the experimental sciences and interdisciplinary research, data analysis has become an integral part of any scientific study. Issues such as judging the credibility of data, analyzing the data, evaluating the reliability of the obtained results, and finally drawing the correct and appropriate conclusions from the results are vital. The text is primarily intended for undergraduate students in disciplines like business administration, the social sciences, medicine, politics, macroeconomics, etc. It features a wealth of examples, exercises, and solutions with computer code in the statistical programming language R, as well as supplementary material that will enable the reader to quickly adapt all methods to their own applications. *An Introduction to Data Analysis Using IBM SPSS* Lokesh Jasrai, 2024-12-13 This textbook elaborates on the basic understanding and application of statistical tests and data analysis using hypothetical datasets and SPSS version 22.0. It presents step-by-step processes and to the point interpretation for quick assimilation and comprehension. *Data Analysis Using SPSS* Begins with the stages of data entry and goes on till editing and data visualization. Takes the readers through descriptive statistics, frequency, univariate, bivariate, and regression analysis, cross tabulation, linear models, and non-parametric test procedures. Presents information through dialog boxes and tabular charts and also incorporates important formulae, calculations, and illustrations of sample data for an in-depth understanding of concepts and results. Can be used as a textbook as well as a reference book as it helps to build conceptual understanding, gaining software skills, and communicates data and its insights to accomplish research assignments, research capstone projects, and PhD research work. With comprehensive coverage, this book would be useful to the students, researchers, and teachers of the various social sciences disciplines like Psychology, Sociology, Education, Social Work, Agriculture, Management, and other allied subjects.
